

Beverly, Female Patient

I was diagnosed with Neuro Endocrine carcinoid when I was 67 years old. I began to develop severe abdominal and right upper quadrant pain that I could not live comfortably with. On a scale of 0 to 10 I was a 20. After 2 days of Calmar Therapy treatments I slept through the night with no pain. I was able to eat my meal without pain and had normal bowel movements after discontinuing narcotic medications. From my own personal experience I can attest to the beneficial effects of Calmar therapy. I did not think I would be free of pain for the holidays. I am totally free of pain and will enjoy the time with my family. Without Dr. D'Amato's knowledge and expertise of Calmar therapy this would not be accomplished. Dr. D'Amato's nurses Lynne and Kelly are outstanding. They are kind, caring and knowledgeable. With their assistance it made my treatment very comfortable. Again I cannot thank Dr. D'Amato enough for this great invention, which without it, I would not have been able to live my life in comfort.

Female Spinal Stenosis Patient, 73 Years Old

I came to the urgent care clinic with severe sciatic pain running up and down my leg into my foot. I felt like was walking on a live wire. This was my second time in 4 weeks. Dr. D'Amato mentioned a new procedure he was doing and suggested I try it. He explained to me what it was, I was a little skeptical about it but decided to try it. The first 3 visits didn't do too much for me but after my 4th visit I felt almost normal.

Dalia, Female Patient

I have been suffering with bursitis pain in my left hip and pain and numbness in my lower left leg (calf) and foot for the past three years. This is the result of stenosis in my lumbar spine affecting my sciatic nerve. The quality of my life had been affected by this pain. I could not climb stairs, get up off the chair, stand in one spot for any length of time, exercise or take even a fifteen- minute walk to the end of my street without limping back. I was also having trouble sleeping at night, especially if I tried to position myself on either side. I have had six lumbar epidural injections and two cortisone shots in my hip, none of which helped for a very long to ease the pain.

After just one treatment with scrambler therapy, I was able to stand much straighter and not limp. The other immediate result that I had was a better night's sleep without tossing and turning from hip pain. After ten treatments, along with another cortisone shot in my hip, I have been about eighty-percent pain free. I have been able to climb stairs, get up from sitting in a chair with no problem and take that fifteen- minute walk up and down my street without limping! I am looking forward to getting back to an exercise routine. But right now I am enjoying normal living and moving

-Thank you Dr. D'Amato!

Male Soldier, 37 Years Old

I would like to sincerely thank you and your team for the professional and kind treatment you have provided for me during my stay here. Ya'll have gone out of your way to make us feel like we were almost members of the family.

For those that may be considering treatment, let me provide you with a bit of my own background and how the treatment has helped me.

I am a 32-year old soldier. In March of 2007, while I was stationed in Germany I had surgery to stop the progression of a previously diagnosed disorder. I have been suffering from chronic pain and headaches for 3 years. I have been prescribed many different types of pain medications, but they did not take the pain away. I had been taking ibuprofen to the point that I had damaged my small intestine. The doctors switched me to acetaminophen and I took that until I had noticeable damage to my liver. I had tried many different forms of alternative pain relief, some of which took some pain away, but none of which took all of it away.

When I started the Calmar treatment I have to admit I was a bit skeptical, but after the very first treatment, all of my pain was gone. I was simply amazed! Not only did the pain go away completely, but it stayed away for much longer than I expected. I am very happy with the results I have received from therapy. Because of you I can continue on my daily living again and also continue on in my military career!

Thank you so much!

Female Patient, 40 Years Old

I had a chronic painful sensation in my arm for almost two years. I decided to try Calmar Pain Relief Therapy provided by Dr. D'Amato and was amazed that just after two treatments I was pain free. I am planning to come back to Dr. D'Amato's office soon as I need another treatment for my leg. I would like to thank Dr. D'Amato for helping me with my chronic pain that I thought I would be living with every day. I also would like to thank his staff as I found them very caring and supportive.

Carla, Female Patient

As a young girl involved in gymnastics and horseback riding, I've had my full measure of injuries due to spills and falls. Couple that with a serious car accident seven years ago, my spine would best be described as that of a disabled person. My pain was chronic and I actually damaged my stomach from taking too much aspirin.

In desperation, I sought the advice of a pain doctor who prescribed narcotics for me which gave some relief but eventually left me with an addiction. Again, desperate for a solution, I was led to your office. The treatment I received from you was nothing less than life changing! After your treatment, my neck and spine have never felt better. I have regained partial motion in my neck and my pain has receded dramatically. I can't thank you enough for the caring demeanor I received from you and your staff. The Calmar device is a way out for people with chronic spinal pain and solution to the use of addictive drugs.

Again, thank you so much, and God bless.

Testimonials

My son originally had RSD when he was 11. He had injured his right foot and had the allodynia and had to be in a wheelchair for a month. Then he had a miraculous healing, which his doctors verified. Everytime he grew, he would experience some pain, but it wasn't debilitating and didn't last long. Then he tore some ligaments in his right ankle when he was 15, but he was fine. Exactly a year later, when he was 16, he suddenly started feeling pain in his right ankle and it got worse and worse and two weeks later, he was diagnosed with RSD again. He went on Vicodin and did pool therapy and physical therapy, he had three nerve blocks, which didn't last long and the last one made it worse and made it spread up his leg. We took him to Dr. Rhodes in Corpus Christi and bought the STS machine. This also made him even worse, if that were possible. He ended up having to take hydromorphone. He finally agreed to go for prayer for healing at our church. He felt God telling him that He was going to heal him, just not right then, which gave him hope but he was also confused. In May, one of my husband's friends heard about the new Calmare pain treatment from his investment broker because Competitive Technology had just announced the release of three independent clinical trials for the machine by the Univ. of Wisconsin, the Univ. of the Commonwealth of VA, and the Univ. of Miami showing the successful treatment of pain by the Calmare treatment. I called Dr. D'Amato in Providence, RI because he was listed as the only doctor who had personally trained under the Italian inventor of the device. He said for us to get our son off of Neurontin and bring him in two to three weeks. We live in Texas, so it was a long way for us to go, but you know you'll do anything for your child when they're in pain. We went to Providence, RI in June after our son had turned 17 and was almost off of Neurontin. Dr. D'Amato is a wonderful, Christian man who is very kind and very knowledgeable. He explained to our son how Dr. Marineo, the inventor, had decoded electrical impulses to send a "no-pain" message through the nerves that were stuck on sending the pain message to the brain. He asked a lot of questions about how our son's injury started, how long, treatments, etc. He then had him show him where his pain started on his ankle and where it ended on his upper thigh. He put one electrode below his ankle and one electrode above his upper thigh. This made me very nervous, because that's kind of how the STS machine works and it had really caused my son a lot of jolting, electrical pain. But it was not painful at all for my son, and three minutes later, he was in NO pain!!! Praise God!!! He had been at a 9 out of 10 before, and he went to 0!!! He kept the electrodes on for 30 minutes and then Dr. D'Amato told him that his pain would come back later on and to keep track of how long it took and at what intensity. It took about 5 hours for the pain to come back and it started at a 2 and eventually went up to 9 again, and he was still taking his hydrocodone. The next day, his pain went to a 0 during treatment again and took longer to come back. After 8 days of treatment, with the pain taking longer to come back and peaking and less and less intensity, he went to bed one night with no pain and woke up the next morning with no pain! He had two more days of treatment and has no pain since June 22, 2010! Today is Sept. 9, 2010. He also was decreasing his hydromorphone at the same time and he was hardly taking any by the time we left. After two more weeks of weaning him down, he was off all medications!

Then I told my friend whose 65-year-old mother has had RSD for 11 years. She went to RI for the is

Testimonials

Calmare treatment with Dr. D'Amato, and she is now also completely pain-free for the first time in 11 years! She can hardly believe it! And she's almost off all her meds! This is such a huge answer to our prayers! We are thanking and praising God for this, and hope other people will also be able to get this treatment and be pain-free! Right now, the Calmare treatment is FDA-approved, but is not covered by insurance because it's so new it's not considered a standard care of treatment. But as more and more doctors start using this across the country, insurance companies are bound to realize that this is cheaper in the long run. If you go to www.calmarett.com, it has locations for doctors that are using the Calmare pain relief treatment.

Blessings,

Kim

January 27, 2010

Dear, Dr. D'Amato

I am writing this letter to tell you how much I appreciate the magic that you have performed on me. In 2004 I took a bad fall and for the last three years I have been in constant pain. I was treated at a hospital and was referred to an orthopedic doctor. The doctor ordered an MRI and found that I have a little mass between the L4 and L5. Due to my history of cancer and my family history of cancer, I was referred to an orthopedic back surgeon. The surgeon explained to me that because the mass is small surgery would not be appropriate due to the small size of the mass. The surgeon stated if the mass were to grow then surgery would be reconsidered. Consequently he referred me to the physical therapy and treated me with pain medication. With that, I had some relief however the pain was still there and I got tired of doctor's visits. I decided to make pain part of my life and stop taking the medication.

In 2007 the pain was intolerable I started getting muscle spasm and cramps in my legs, stomach, arms and face. When the spasms started in my tongue I got scared. Not only was I having the spasms and cramps but when I had a bowel movement, my stomach would cramp so bad that I would scream from the pain. I was treated by my primary doctor and he referred me to a neurologist at Rhode Island Hospital to the Muscular Dystrophy Clinic. I went through several tests, including a muscular biopsy, spinal tap and a nerve biopsy. I was treated with Dantrolen and Neurontin from 2007 to 2009. In November of 2008, I ended up in the hospital for twelve days, I could not move from my waist down. I was in a wheel chair, then started walking with a walker, and finally with a cane. I had physical therapy from that time until August of 2009. I was referred to a physiatrist to manage the pain. He treated me with Avinza 30mg once a day and he administered three epidural injections. I was getting desperate and could not tolerate the pain any more. While in treatment with the neurologist I spoke with a social worker who diagnosed me with depression and told me that I was having panic

attacks. (How he came to that conclusion? I have no idea). The thing was, that the neurologist spoke with the physiatrist and they concluded that I was only looking for drugs. I felt insulted and angry. My last appointment with the physiatrist was in August of 2009 and that was when once again I decided not to take any medications and deal with the pain. I was in pain 24 hours a day. I deprived myself of a good night sleep. Activities that I used to enjoy with my husband, children and grandchildren were a thing of the past. I could not attend Sunday mass. I could not sit for even five minutes.

One Monday morning I was at work and I was in so much pain that I put my head down and said to myself "I can not continue with this pain, I do not know what else to do". I called my husband and asked him "what should I do" he did not know what to say or what else to do for me. The same week my daughter in -law told me about the treatments you were administering to patients with chronic pain. I was a little skeptical at the beginning, but I decided to try anyway. I have to tell you that by the third treatment I was released from that evil pain. Finally, thanks to you and the treatments I am planning to take a trip with my husband at the end of February beginning of March. We are celebrating our 40th anniversary. I have been playing, dancing with my grandchildren and running after my fluffy dog. I only wish that you can continue helping people like me, when doctors do not know what else to do for them and that there is hope and life free of pain.

May the Lord bless you.

Ramonita

Dear Dr. D'Amato

Thank you and everyone else there for how you've helped me. I didn't ever want to do anything because I was in so much pain, and because of you and everyone there I finally feel normal again. I never wanted to talk about it and didn't like when people asked "How's your leg?" Now when they ask I tell them that's it's great. I never thought I would be pain - free, and I didn't think it would work, but after the first day I knew it was worth the trip there. I also can't thank you enough for getting me off of my drugs. It feels so liberating to not be trapped in my own mind and not feel hazy all the time. You are truly a gift from God for everyone that you help. I can't express my gratitude enough, especially for how caring you all are. Unlike other doctors I've been to, you're one of the only ones who truly cares about other people's pain and what they go through. It feels so good to be able to play paintball and go to the gym, and just be active in general! Thank you so much, and I will never forget any of you.

Sincerely,

Sam Mullican

Testimonials

Dear Dr. D'Amato

What a wonderful statement to say I am PAIN FREE AND DRUG FREE. I can not find words to express my gratitude to you for how this miracle came to happen. Last week after I returned home (after a fourteen hour drive home) I went to our church and before I could even think about it I was making a testimonial video telling my story of eleven years of pain and depression and how Calmar ScramblerTherapy brought relief. This is a church called Liberty Baptist with a congregation of six thousand on any given Sunday. As you can imagine that has brought a lot of people who have chronic pain problems asking us about the therapy.

I also wrote a letter to long time friends and family one of those being Suzanne Lily. I have never met Suzanne except by phone and e-mail. I became acquainted with Suzanne ten years ago when I went to Corpus Christi, TX to receive treatment with DR. Rhodes. I am so thankful she called you and is making arrangements to come for treatment along with a friend named Christene, who I met through a conference call last week.

This is truly a miracle therapy and I know through your expertise that many who suffer have been and will be helped. Since I came home I have been going back to the things I like to do. That includes water aerobic and walking for miles with no pain. I have tried to test my limits but there is no doubt that I am free from RSD pain. I have almost completed with drawing from all the anti-depression medications. Thank you Dr. D'Amato this mean so much to me. I am free!!!!!!!

Please place my testimonial on the bulletin board. I am forever grateful.

PS: As soon as we returned home we began making preparations for hurricane earl and I am so very thankful Earl passed our shores with very little damage.

Velma Geis
Smithfield, VA.

Hello to my angel of mercy nurse Kelly and your staff.

Dear Dr. D'Amato

Thank you again for making the scrambler pain therapy program available in this market! I am still in a state of disbelief that you've erased the neuropathy I've suffered with since a back injury 15 years ago. To date: no return of daily shooting pain and no loss of sensation in the areas that were numb for so long. It took me a while to begin to tell friends and co-workers about my experience because it is, frankly, difficult to describe this little miracle of pain resolution!

I now consider myself your unofficial communications ambassador... I am telling everyone about

CALMAR

your treatment program! I recently provided your program materials and case studies to the chief medical officer here at (.....)(NOTE: personal information deleted for privacy). He, in turn, has forwarded the materials to the leaders of our pain service (who attended the ASCO session on the efficacy of scrambler therapy for CIPN). I hope that our physicians evaluate this therapy option and perhaps connect with you as a local expert resource for our chemo patients.

Your treatment has changed my attitude about pain... it doesn't need to be a permanent situation! Thank you, thank you, thank you!!!

Regards,

M.P.

Dear Dr. D'Amato

I have wonderful news to share with you. Yesterday I had a appointment with Dr. Spiegel my Psychiatric Care at Norfolk General Hospital. He declared on record that I no longer needed his services and gave me a medical discharged.. Is that not the most awesome news!!!!!!!!!!!! I did not have to defend my miracle of healing through Calmar Pain Therapy. Thank you so much for this miracle!!!!!!!!Calmar Pain Therapy was the answer for my physical and emotional pain. I have now experienced three month pain free.

After suffering eleven years with **Chronic Reflex Pain I am now free!!!!!!!!!!**. 2010 has been a Great Year and I am with excitement looking forward to 2011.

Velma Geis

Smithfield Virginia

My Health is wonderful!!!!!!!! I Cannot thank you and your team enough for helping me.I am forever indebted to you. The whole experience was incredibly difficult and yet rewarding all at the same time. To be on the edge of despair and then having hope restored, and then physically being restored has been a complete miracle that I have been able to experience. I am COMPLETELY pain free still, and am confident that I will remain that way. I am off all of the meds, and no longer struggling with any side effects or withdrawal symptoms. I am back working out with my trainer and have regained almost all of my strength back. I still have not put the weight back on and struggle with appetite a bit, but I am sure that will come back in time. The kids and family are doing great

Testimonials

although it was a bit of a transformation of home life when I did return. They just were not used to me being around and able to do things again. Their friends were a little taken back by it as well, all good stuff though. I do want to give you a bit of a heads up though. John had to speak in Milwaukee the end of last month. He had been top of the company this past year in the whole country, of about 13,000 employees. Because of his accomplishments Northwestern Mutual had asked him to give the keynote speech at their annual meeting on one of the mornings. During one of three of his speeches, he described what a difficult year this had been for our family and the struggles that I faced medically. He talked very freely about our devastation and that fact we had lost hope with my RSD and no cure that is until we heard about Calmar and your team. The whole arena was in tears, you could have heard a pin drop in there. Here that number one guy isn't talking about his success and accomplishments; instead he is talking about pain and overcoming obstacles and adversity. The point in all of this is the best part. After his speech we have been overwhelmed not only by the pouring of support for us but also the need for you and your team. We have given your name and information out to countless people, and I truly mean COUNTLESS!

We have been approached by so many people that were touched by my story. People that have RSD, people that have spouses with it, family members, church members, and friends. We have been able to give so many people renewed hope that have lost it before. As hard as the experience was for me, it is so worth it if I can be a vessel to help bring others to you and healing. You hopefully will be hearing from people all over the country asking for help/hope soon, if you haven't already.

I thank God for you and your talents that He has blessed you with. I thank you for listening to Him and reacting to your calling. I thank your devotion to your patients and their families. You make us not feel like patients, but instead like extended family that you would do anything for. You are an amazing man, with an amazing wife, and an amazing staff/team that fully supports and follows your lead. I hope you are blessed beyond imagination. I thank you again for everything you have done for me only physically but emotionally as well.

Please say hello and give hugs to Alicia, Kelly and Janette. They are such dear women with wonderful hearts. I miss all of you.

With much love and gratefulness,

Melynda
