

2052 - *A Global Forecast for the Next Forty Years*

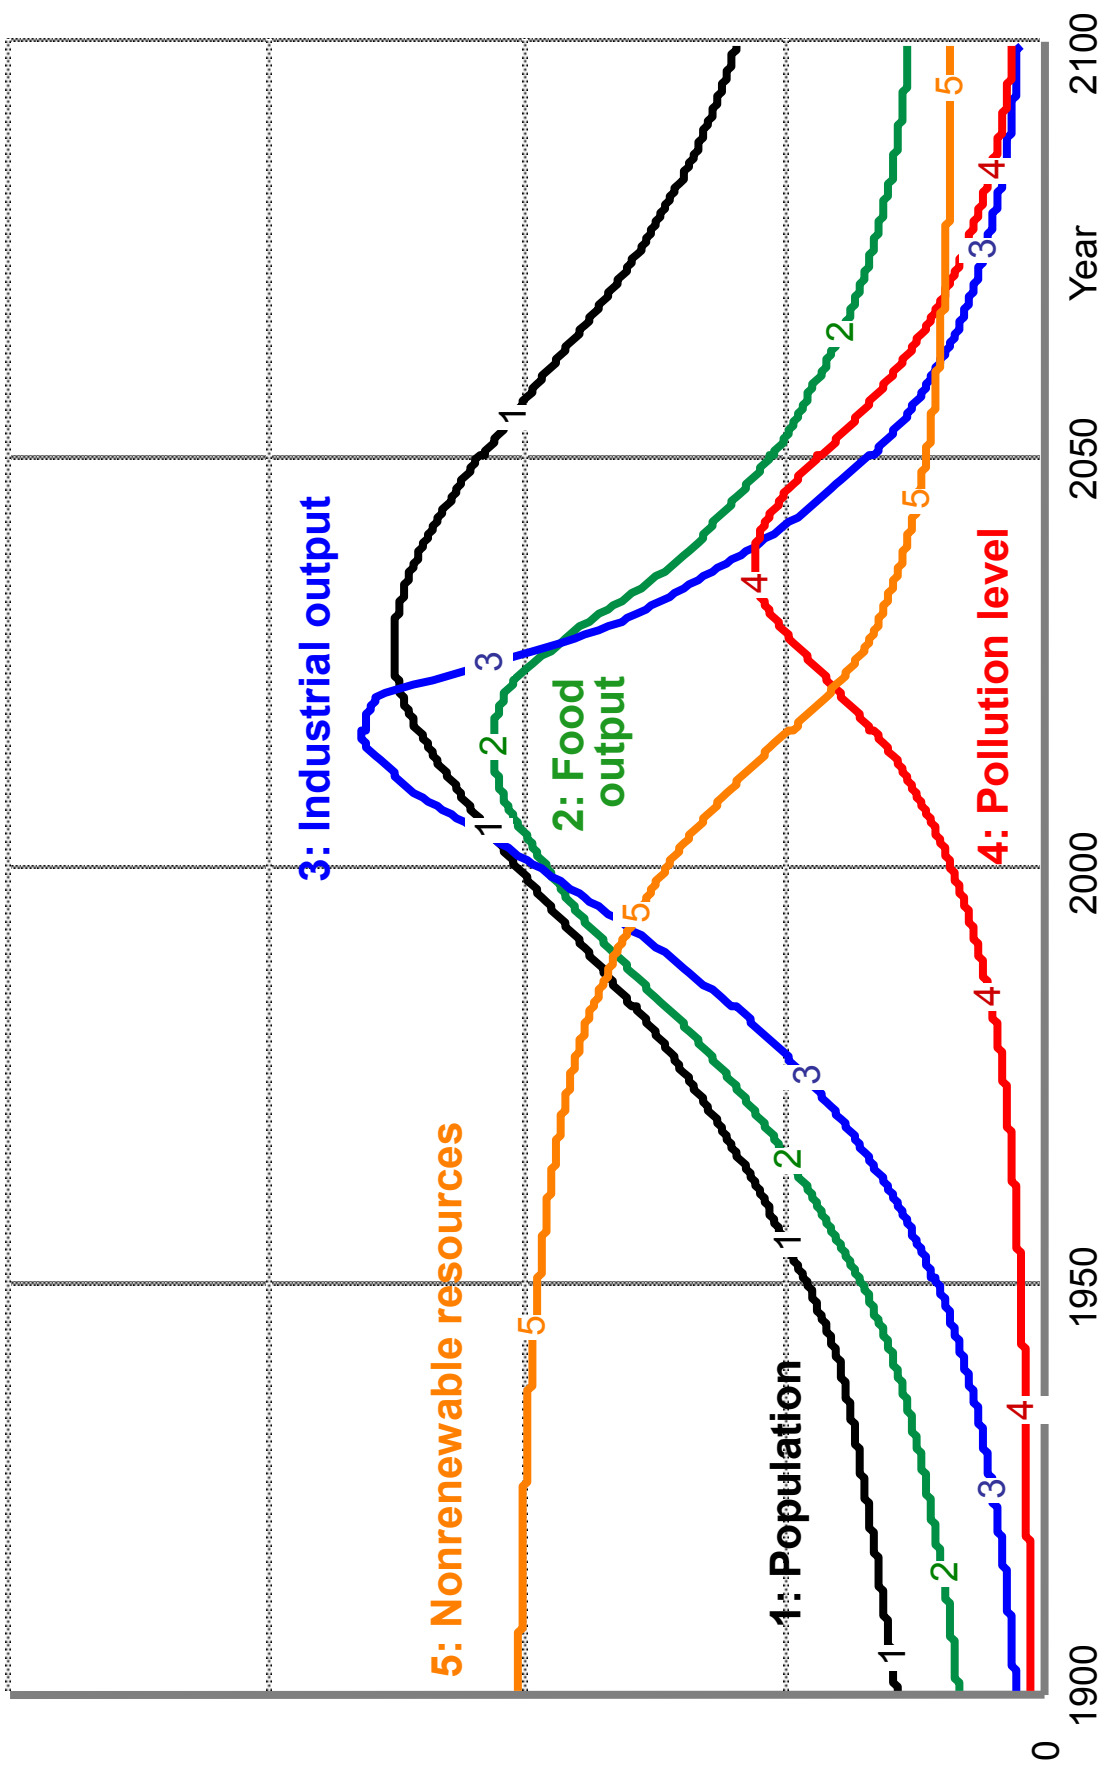

Jorgen Randers
Professor
Center for Climate Strategy
Norwegian Business School BI

Pestel Institut
Hannover, Germany
October 13th, 2012

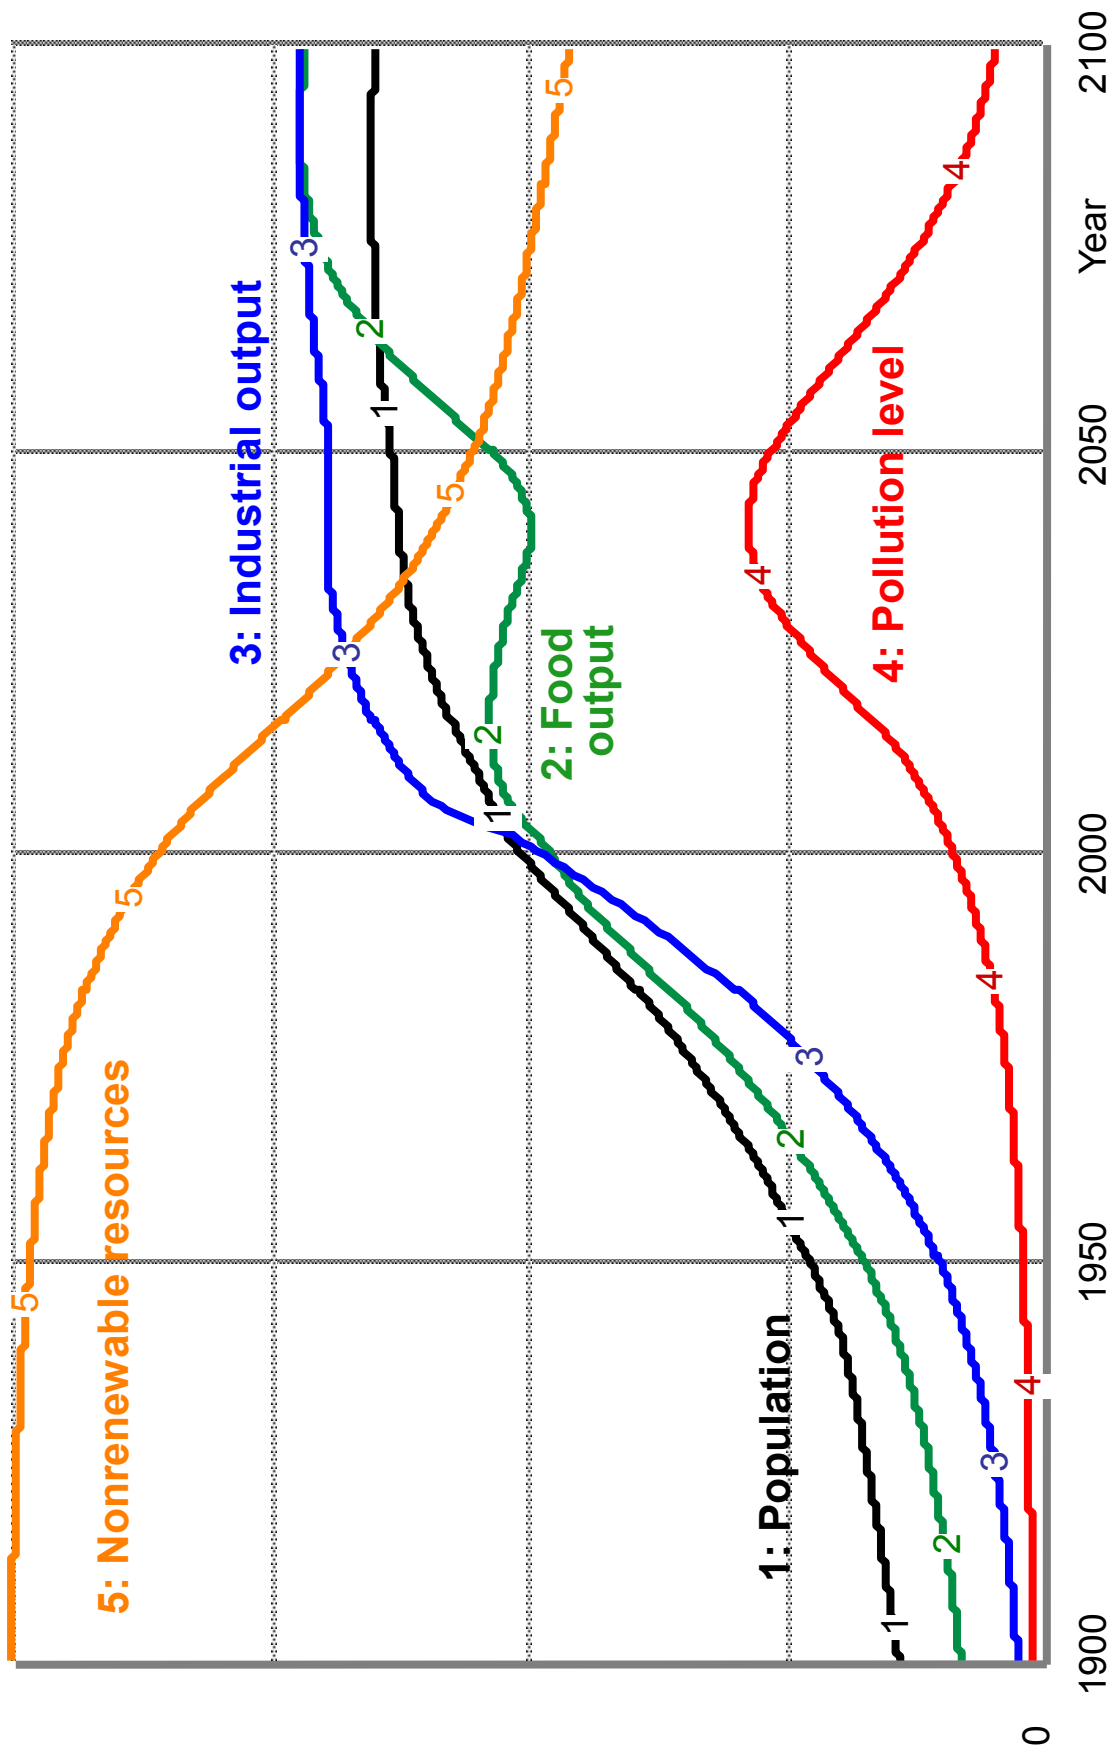

12 scenarios for the 21st century

Limits Scenario 1: Resource crisis

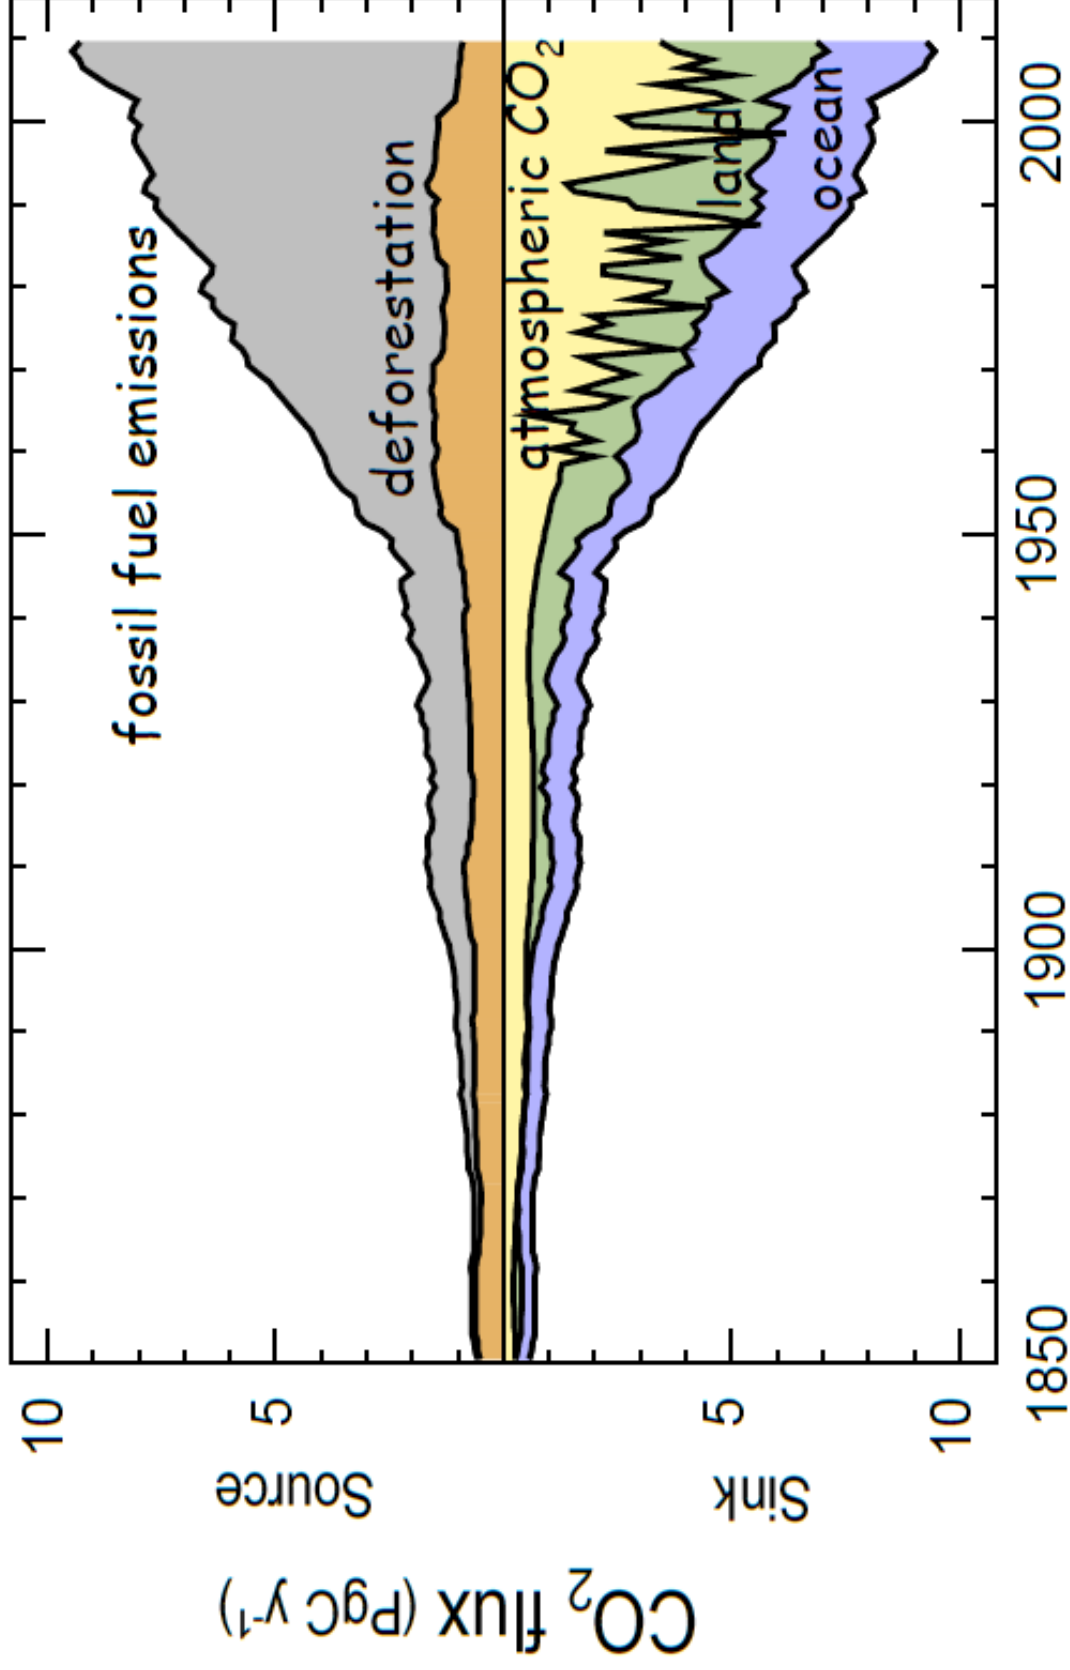

Limits Scenario 9: Sustainability

Limits to Growth: A small and fragile world

Overshoot: Emissions is twice absorption

EINE GLOBALE PROGNOSE
FÜR DIE NÄCHSTEN 40 JAHRE

2052

JORGEN RANDERS

Der neue Bericht an den Club of Rome
40 Jahre nach »Die Grenzen des Wachstums«

For all numerical data
and the forecast model,

The five regions used in the 2052 forecast

| Region | Population 2010 (billion people) | GDP 2010 (trillion \$ pr year) | GDP per person 2010 (1000 \$ pr person-year) |
|------------------|---|---|---|
| US | 0,3 | 13 | 41 |
| China | 1,3 | 10 | 7 |
| OECD-less-US (1) | 0,7 | 22 | 30 |
| BRISE (2) | 2,4 | 14 | 6 |
| ROW (3) | 2,1 | 8 | 4 |
| Sum world | 6,9 | 67 | 10 |

- (1) Old industrial world, including EU, Japan, Canada, Australia, New Zealand etc
- (2) Brazil, Russia, India, South Africa and the ten biggest emerging economies
- (3) The remaining ca 140 countries of the world

World population will peak in 2040

Figure 4-1 Population – World 1970 to 2050

World GDP growth will slow down

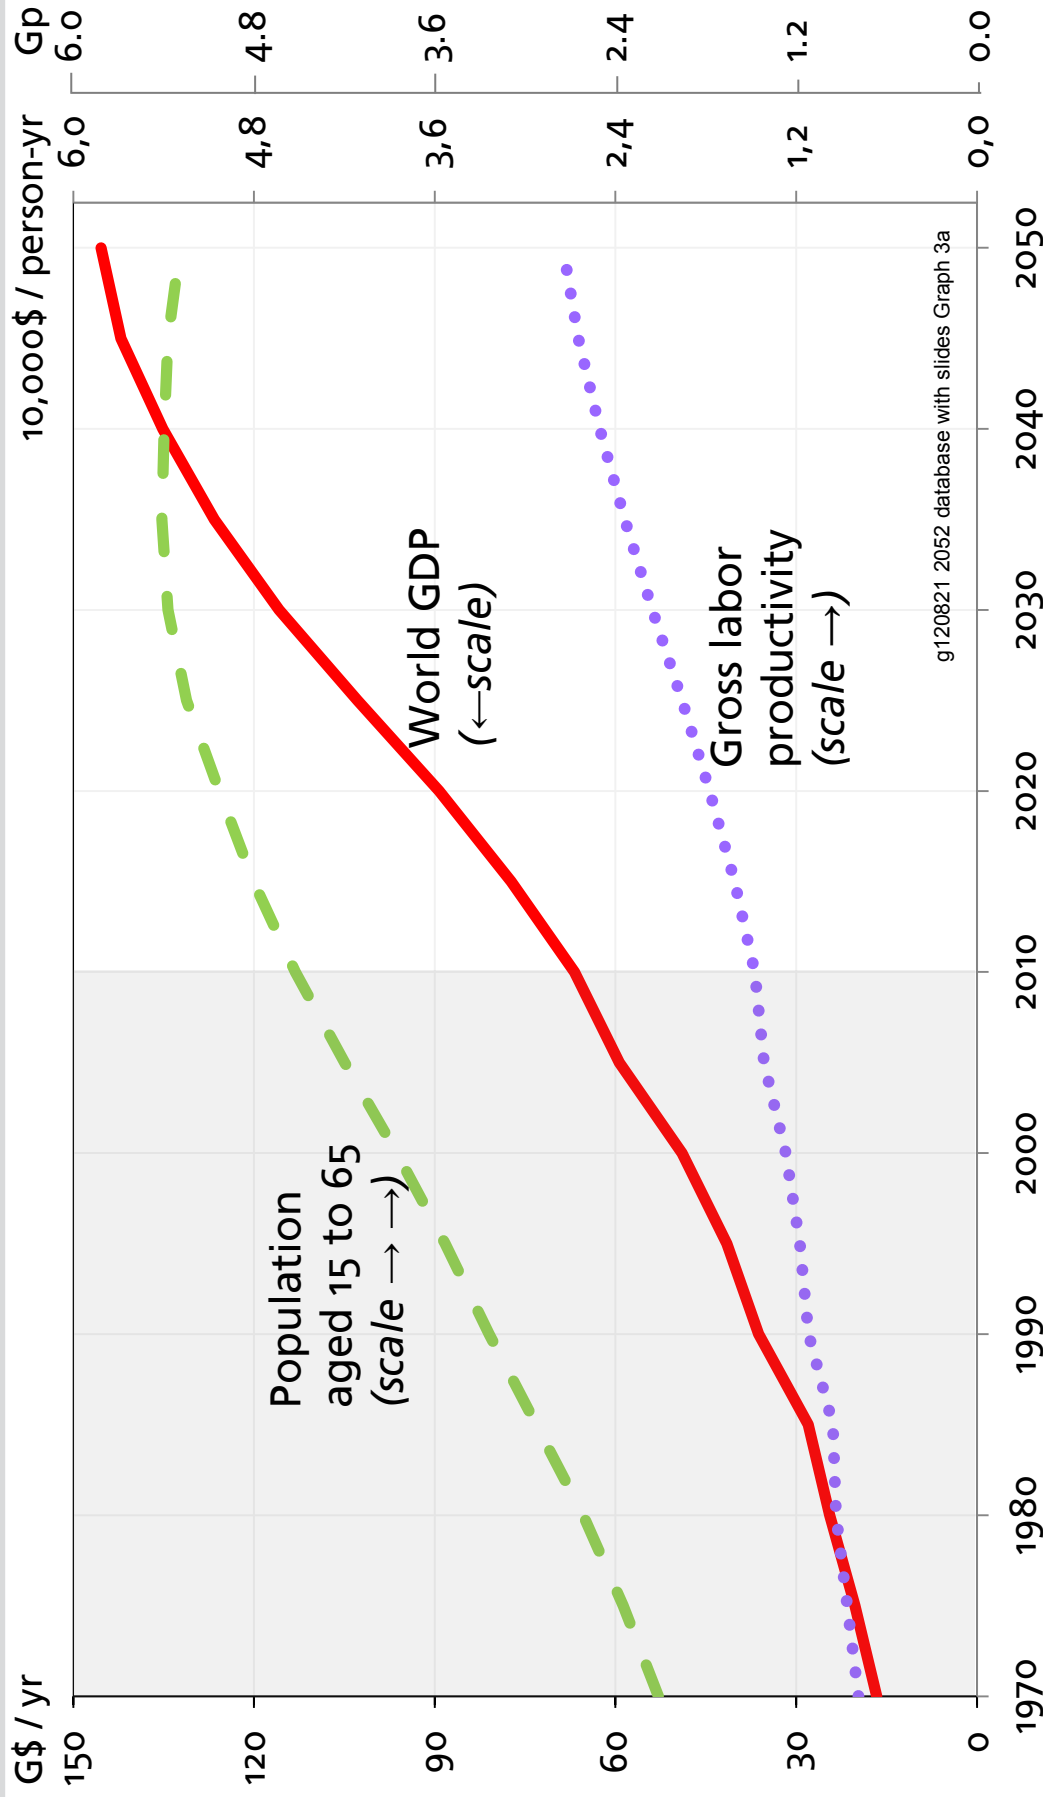

Figure 4-3b: Gross Domestic product – World 1970 to 2050

Definition: GDP = Population aged 15 to 65 years multiplied with Gross labour productivity

Share of GDP in investment will grow

Figure 4-4: Production and Consumption – World 1970 to 2050

Energy use will peak in 2040

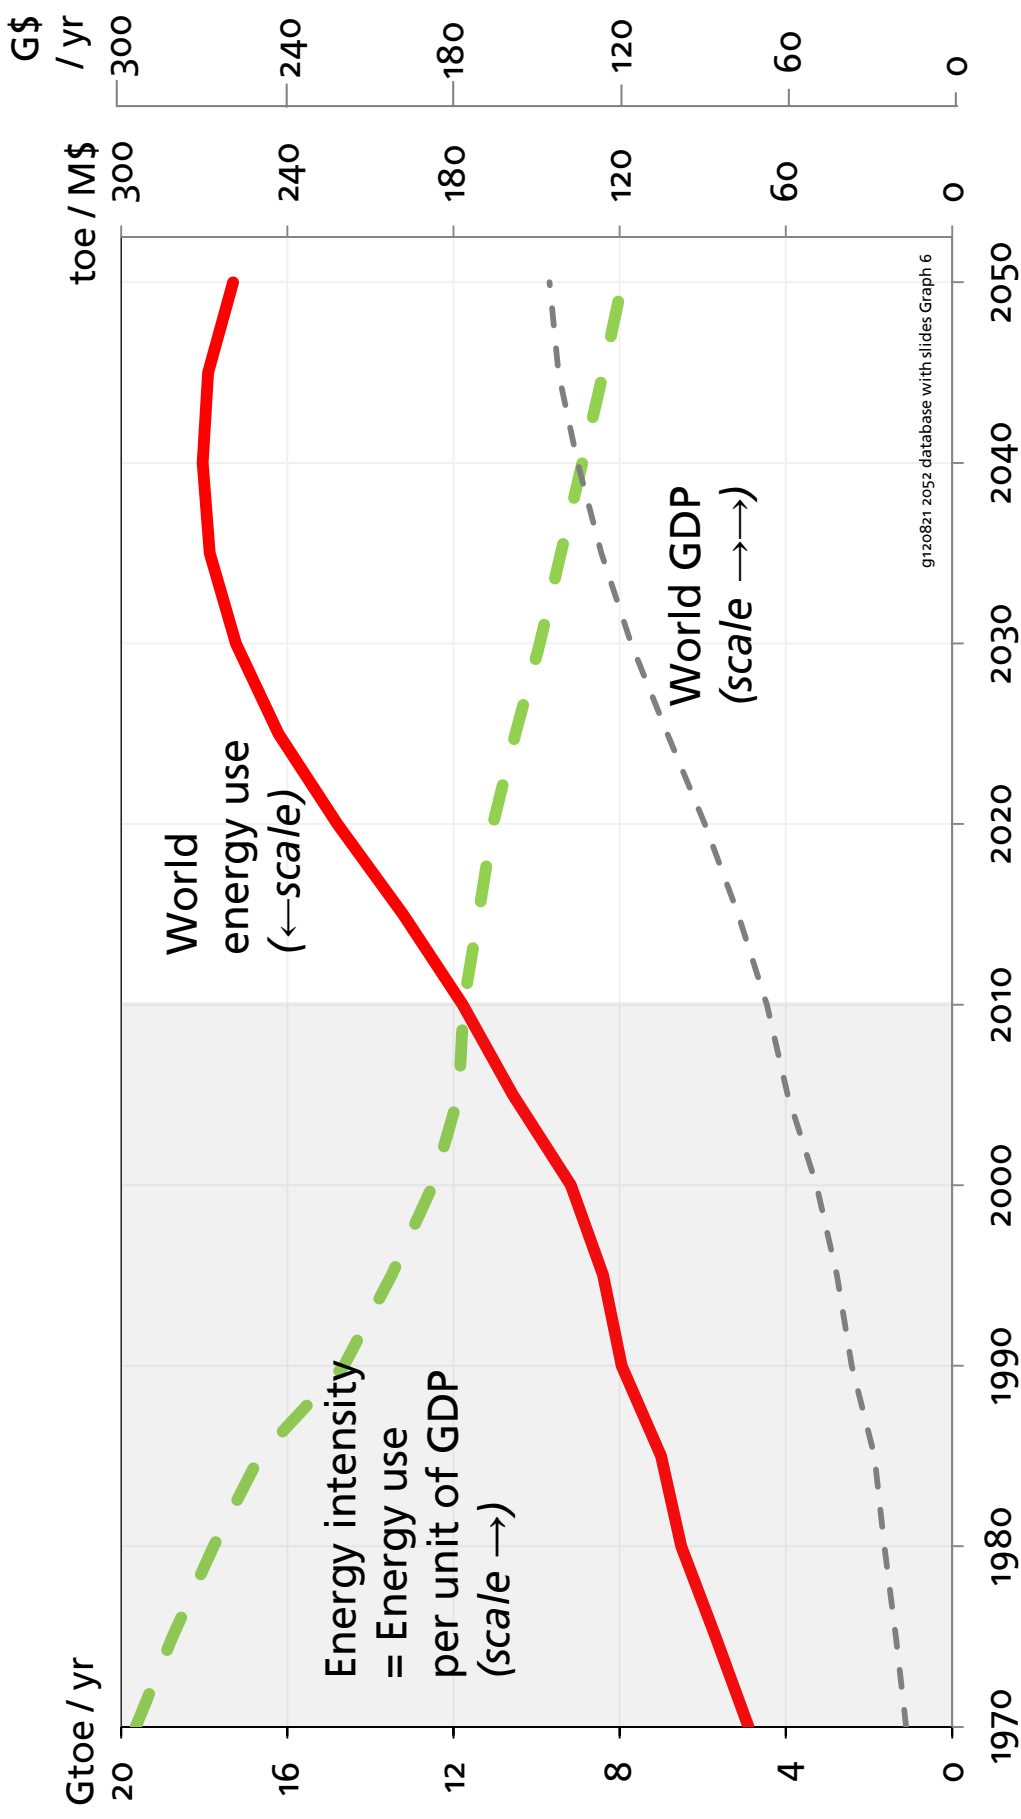

Figure 5-1: Energy Use – World 1970 to 2050

Fossil fuels will prevail

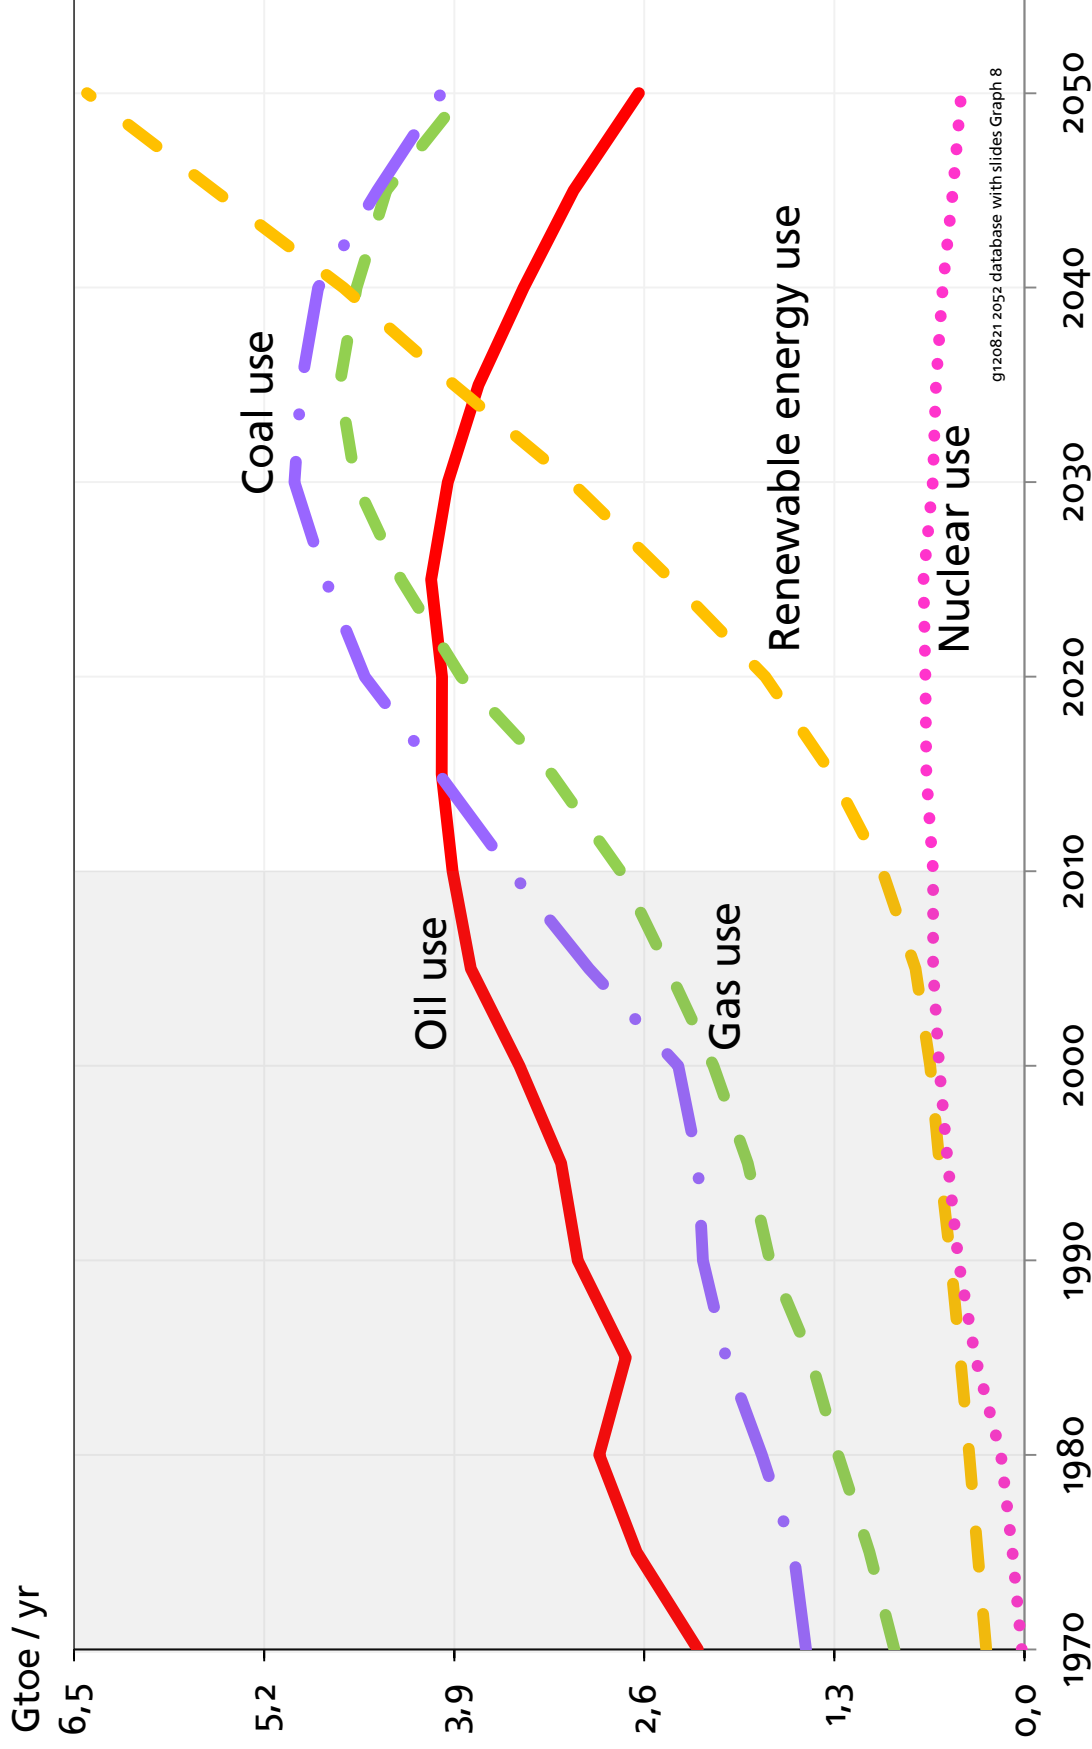

Figure 5-2: Energy Uses – World 1970 to 2052

World CO₂ emissions will peak in 2030

Figure 5-3: CO₂ Emissions from Energy Use – World 1970 to 2050.

Temperature and sea-level will rise

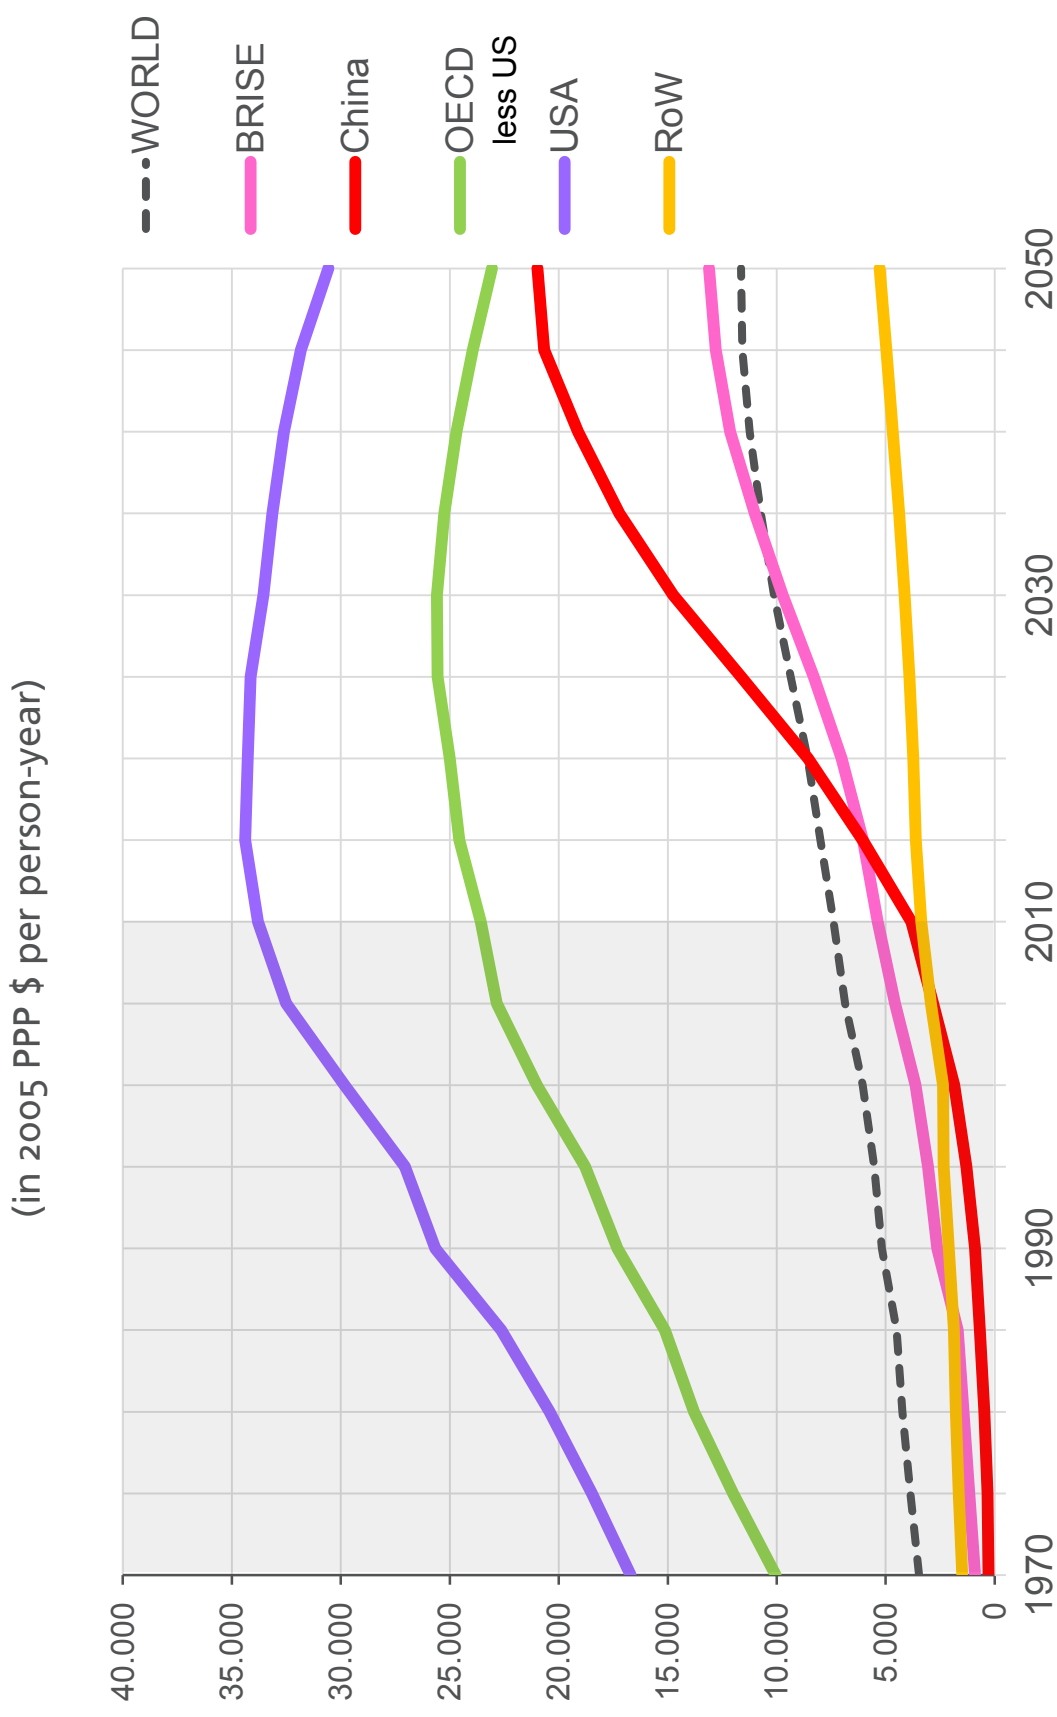

Figure 5-4: Climate Change – World 1970 to 2050

Average disposable income – 1970 to 2050

Democratic decision making takes time

What should be done? – Globally

- 1. Slow population growth: Have fewer children, particularly in the rich world**
- 2. Reduce the footprint: Eliminate fossil fuels, first in the rich world**
- 3. Help the poor: Build a climate-friendly energy system in the poor world**
- 4. Temper short-termism: Establish supra-national institutions**
- 5. Establish new goals: Increase societal wellbeing in a world without growth**

And so? Will this be the end of

- 1.** capitalism?
No, in spite of my desire for modification
- 2.** economic growth?
Yes, GDP growth will slow toward 2052
- 3.** slow democracy?
No, we won't speed up in spite of trying
- 4.** generational harmony?
Yes, and we old will loose
- 5.** stable climate?
Yes, unless there is extraordinary action

I don't like what I see!
