## A New Lifestyle Brand: Julia Moss Designs

Julia Moss Designs offers vintage home decor, chic gifts, limited-edition silver, and a silver-cleaning process for heirloom pieces!

by New York Spaces

Julia Moss Designs

**By Julia Moss**

Julia Moss Designs (<http://juliamossdesigns.com>) is a new, modern lifestyle brand that is fulfilling my love of bringing color, style and vintage inspiration to homes everywhere. This is certainly not your Grandmother's silver. These vintage home collections are inspired by the modern approach to entertaining. My team and I breathe new life into each silver piece, all of which are handpicked for their uniqueness and beauty.

These pieces help homeowners put their own colorful twist and personalized touch on any room in their home—from a family room tray that holds the remote controls with fashionable flair, to the dressing room where a footed catchall displays delicate soaps, or a revered bowl that stores makeup supplies, to the bar or buffet table outfitted with a champagne chiller, repurposed biscuit tins, or even a caviar and vodka server.

Each limited-edition piece is hand-finished and preserved using a hi-gloss PowderColorized™ process, which enhances each innate detail and renders it ever more beautiful. No more polishing! Colors change seasonally to ensure homeowners stay on trend. For those who have their own forgotten silver stored in a box, Julia Moss Designs can breathe new life into family heirlooms with the Next Generation Silver process. Customers can choose from more than a dozen distinct color options, send their silver to our company, and after about six weeks, their once-abandoned silver is ready to be displayed with a fresh pop of color!

Finding a chic gift has never been easier or more fun, whether it is a personal treat or a highly unique gift for a special occasion. Purchase online at [juliamossdesigns.com](http://juliamossdesigns.com).
