

HELPING KEEP
PEOPLE AND PETS TOGETHER

Your pet has a personality of its own.
Yet even the most loving animals
can behave in undesirable ways.
Whether defensive growling or
compulsive chewing, such behaviors
threaten even the closest relationships.

Chicagoland Veterinary
Behavior Consultants
teaches you ways to modify, adapt,
or stop negative behavior,
including:

- Aggression
- Anxiety Disorders
- Elimination Disorders
- Phobias and Fears
- Stereotypic/Compulsive Behaviors

SET BEHAVIOR BOUNDARIES

Chicagoland Veterinary

Behavior Consultants consider all possible factors that influence an animal's behavior, including:

- Breed
- Experience
- Physical Condition
- Owner Handling
- Living Environment

1 YOUR PET'S PROFILE

Prior to meeting with a consultant, you'll be asked to complete a questionnaire outlining your pet's behavior and medical history. The information you provide will be used as a basis for evaluating your pet when you visit.

Because Dr. Ciribassi is also a veterinarian, he can help identify possible physical conditions that might be contributing to your pet's behavior.

3 FOLLOW-UP

Depending on the nature of the problem(s) and your relationship with your pet, many behavior issues can be resolved in one or a few visits—and most are treatable with consistent, patient, commitment to your pet. After the initial visit, follow-up meetings (if necessary) are 30 to 60 minutes. Consultations also include regular telephone follow-up.

NOTE: Non-behavioral procedures will be directed to the referring veterinarian. Follow-up paperwork is forwarded promptly to the referring hospital.

- Environmental Modification
- Behavior Modification
- Judicious Pharmaceutical Use when indicated

2 INITIAL CONSULT

You and your pet will meet for a private, one- to two-hour session with a veterinarian experienced in treating animal behavior problems. Discuss which behaviors are normal and abnormal, and how to manage them more successfully.

RECOGNIZED ANIMAL BEHAVIOR EXPERTISE

Competent treatment of animal behavior problems requires intensive study, research in animal behavior, and training in behavior modification

In addition to academic excellence, **Dr. Ciribassi** offers an intuitive connection with animals. His level-minded approach and years as a practiced veterinarian generate practical, proven solutions.

- 2006 Diplomate of the American College of Veterinary Behaviorists, a national group of animal behavior specialists under the auspices of the American Veterinary Medical Association
- 1984 Graduate of University of Illinois College of Veterinary Medicine
- Past President of the Chicago Veterinary Medical Association (CVMA)
- Media spokesperson on animal interests
