

Travelers is rated A+ by A.M. Best. KZ sees their strengths including a broad, competitive package market, and being highly aggressive with rates in their select appetite of worker's compensation risks. Travelers is also quite competitive with their Business Auto quotes. These features are key in navigating a soft market.

Travelers' business package market is so broad, there are very few things we can not quote with them. They even have a GL/Property appetite for several artisan contractor classes. Included in Travelers package appetite is technology risks, restaurants, habitational, auto service, wholesale distributors, retail stores and much more. Packages can be quoted with unusually high limits for similar programs.

While Travelers' workers compensation class appetite is relatively light, their aggressiveness on rates is tremendous and with the participation of KZ Insurance, we can offer rates at and below those of the lowest of the carriers out there now. If you have workers comp needs fitting the main street type classes of office, retail, restaurant, and other similar risks, you will want to submit to Travelers through KZ.
