

VITO SPATAFORA

ART DIRECTOR / VISUAL DESIGNER

I love all areas of design and believe in taking a holistic approach to solve problems through effective and beautiful design. My vision is to apply my capabilities to building a better world through bold and effective visual communication that inspires positive impact.

I am highly organized and adept at meeting tight deadlines that are common in the advertising industry. My big picture thinking coupled with the ability to approach projects from concept to final production has proven to deliver purpose driven solutions that are functional, innovative and create lasting impressions.
