

K1 CHAIR

K1 chair is minimalist design created by Poland-based designer Marta Adamczyk from studio Moskou. The concept was to create simple, linear chair and K1 seems to be a graphic object.

The chair is full of contrasts. The profile of this piece looks like linear, slim chair contour, but its shape is a solid steel construction with wooden elements in the seat and backrest. Sharp lines of metal frames contrast with the natural grain of wood. This design integrates clean, simple, minimalistic form with tiny refined details. The chair is made from powder coated steel and solid oak wood.

Dimensions: 64x38x77 cm

Materials : oak wood , steel
