Outside therapists are encouraged to come and support their students in the Aftercare. Outside therapists must follow all Beyond the BASICS policies.

7. What does inclusion look like in the aftercare setting?

No student at Bridges will be turned away from the program simply because of special needs. The aftercare program will be focused on social interactions and play. We will teach a social skills lesson each day that will benefit all children. Then we will practice the skill throughout the day. Play time will be facilitated so that everyone is participating and included. Please see website and Parent handbook for more specific details.
