

# Easy Rod Technical

## The Product

- The Easy Rod range of stair rods are available for either a runner carpet or fully fitted.
- The Easy Rod range are made to measure, see below for measuring guidelines.

## Easy Rod Stair Rod For Carpet Runner.

- We recommend that you add 4 inches (10cm) to the width of your carpet and use this measurement to give you the tip to tip length of the stair rod.

- Because of the universal nature of the Easy Rod bracket it can be used on both deep pile and thin carpets. When used on a deep pile carpet the screw thread will be visible when viewed from the side.

ANY QUESTIONS  
Please call 01207 591176 For friendly expert advice.

## Easy Rod Rod For Fully Fitted Carpet.

- Depending on the width of the stair we recommend that you leave a 1 to 2 inch (2.5 to 5cm) gap between the stringboard and the tip of the rod at both sides of the staircase.

## Prepare Brackets For fitting

- The brackets for runner carpets and fully fitted are the same and need no preparation.

## Fitting Rods To Stair.

- The brackets are supplied with number 6 screws and you must drill a pilot hole before fixing the brackets to the stair. For softwood create a 2.5mm pilot hole and for hardwood create a 3mm hole. A clearance hole of 4mm should be drilled to accommodate the screw shank. Remember to set your power drill on a low torque setting to avoid breaking the screws. For fully fitted carpets the supplied bracket sits on top of the rod and screws fix it through the carpet.

## Care and Maintenance

- We recommend using a damp cloth to keep the rods clean, any household cleaners used to clean the wood and paint work of the staircase should be applied to the cloth and not directly onto the surface of the stair, as over spray can cause a speckled tarnish on the rods. If any liquids are inadvertently spilt on the stair rods they should be cleaned immediately with a damp cloth and dried with a clean cloth.
