

ReedITC is an IT and operations consulting firm focused on driving change and delivering operational results. The ReedITC team combines consulting and deep operational experience to provide strategy, program management, and IT and operational transformation.

ReedITC's clients have used their expertise to:

- Deliver savings and efficiency;
- Transition current IT and operational capabilities to managed service, including Cloud;
- Transition current organizations, processes, infrastructure, ERP and legacy operations to new service delivery models;
- Assess and transition current state technology, processes and organizations; and
- Remediate troubled programs, including ERP, ITO and BPO initiatives.

With offices in multiple locations, ReedITC has a senior team that is capable of meeting local and global requirements.

Our clients look to us to resolve tough issues and deliver results.
