Chairman: Prof. K.J Nath

Dated: 25-11-2013

TO WHOM IT MAY CONCERN

This is to certify that Dr. Arup Kumar Sengupta, P C Rossin Professor of Environmental Engineering at Lehigh University, United States, has developed the HIX ADSORBENT ARSENIC REMOVAL TECHNOLOGY for treatment of ground water. This has been patented by Layne Christensen (New Jersey, USA) as LayneRT. The various aspect of the technology was patented before the Technical Committee of the Arsenic Task Force on 13th May 2010. The Technical Committee approved the technology and recommended the same for installation of Arsenic Treatment Plants by the PHED, Govt. of West Bengal, subject to their providing performance guarantee and agreeing to sludge disposal condition as per the NIT.
