\$3850*

MODERN VINTAGE (FILM + DIGITAL)

- Some of our most popular photos were taken with film or a hybrid of antique technology and modern digital equipment. For years we have taken photos of our own precious life events on film because of the timelessness of the imagery. We now offer this as an option for our wedding clients who truly want a unique visual experience only possible through classic photographic technology. The coverage will be a mix of analog and digital technologies offering the best of both worlds. All film will be scanned and delivered digitally.
