CURATORIAL EXPERIENCE

150 Media Stream **Curator/Director**, 2015 — Present

Producing and curating unique multimedia artwork for [150 Media Stream](#), a public new media art installation located in the lobby space on the 150 N Riverside Plaza; Divided into 89 LED blades that stretch over 150 feet long and reach 22 feet in height, the installation is the only structure of its kind dedicated to showcasing Chicago artists, culture and history alongside renowned and emerging artists from around the world.

- Working with new media artists and designers to create a forum for the exhibition of their work on the installation
- Working with local educational and cultural institutions, educators and students to produce content for the installation
- Organizing “special exhibition” periods for interfacing with the Chicago arts and cultural community
- Producing personal artwork for the installation
- Developing content strategies for the installation, including both short term (grand opening and installation “unveiling”) and longer term (day-to-day content) programming schedules
- Working with the system integrator to design and oversee the content delivery system of the installation including its hardware components and software architecture

Selected reviews, interviews and recognitions for 150 Media Stream

2017 Chicago Innovation Awards (Winner, with 150 N Riverside Plaza)
