

2x4 Pendant

Finishes

2x4 Lumber: Eastern White Pine is a softwood (pinus strobus) sustainably harvested throughout the Northeastern region of the U.S and Canada. Eastern White Pine has fine grain and uniform texture, shapes easily for patterns and profiles, stays true to form, and holds finishes very well, making it an excellent choice for our 2x4 Pendant. Eastern White Pine lumber is kiln-dried to make it straight and dimensionally stable.

End Caps: all end caps are made from solid steel or brass and sealed with a clear, satin lacquer.
