

Feed Delivery Box

Durability • Versatility • Performance • Design • Service

Nobody builds a delivery box like MMI

Live Bottom Floor Design Performs Better Than Auger Systems

- ▶ **Less Flake Damage** – Less damage to flake grains than with an auger delivery box
- ▶ **Efficient Design** – Long life, low maintenance, more capacity with live bottom design
- ▶ **Energy Efficient** – Lower horsepower and more fuel efficient than auger style boxes
- ▶ **Hydrostatic Drive** – Live bottom floor and discharge controlled separately giving infinite control over output rates.
