- 7 Make the 12" Compass block following instructions from the Fat Robin 60° Mariner's Compass Book. Make a faced circle center using the finished size circle template (5.85") for a 12" Sunflower from the template sheet in my book, and appliqué it onto the center of the block. (I am using the Sunflower center so the middle block looks more like a flower.)

Make a 12" freezer paper circle template, press onto the back of the Compass block and press edge to back of compass (Appliqué method found on page 15 of your Fat Robin 60° Mariner's Compass Book and on my website under the TIPS tab).

- 8 Center and appliqué the 12" Compass block onto the 10" Quarter Compass Band, continuing to center and appliqué each band on top of the next, rotating the 10" and 24" Quarter Compass bands 22.5°. I did all of the appliqué by using a hem stitch on my sewing machine and using a walking foot.

Finally, appliqué the "Blossom" onto your background. I tape my background onto the floor to make sure it is laying flat and stretched just enough that there are no wrinkles. Then I start pinning the "Blossom" onto the background, working on opposite points and making sure to also stretch it out just enough to make sure there are no wrinkles. After the "Blossom" unit is appliquéd onto the background, I carefully cut out the background fabric behind the largest "Blossom" band. Quilt and finish as desired.
