

LOST & FOUND

NO 01	NANO CHALLA, <u>ETHIOPIA</u>		STORY
	<p>Origin: Hoja Blanca, Cuilco, Huehuetenango - Guatemala</p> <p>Producer: 400 smallholders</p> <p>Elevation: 1,950 - 2,000M</p> <p>Process: Washed</p> <p>Variety: Ethiopian Heirloom</p> <p>Taste: Sweet aromas of citrus fruits with clean defined sugary finish</p>		<p>The Nano Challa cooperative is found in the Agaro district in mid-western Ethiopia. Their 400 member farmers founded the cooperative in 2010. The management is strong and therefore they succeeded to produce highest quality from year one. This coffee is the result of a Tehcnoserve project that is meant to increase the quality of the coffee and prices for the farmers through a transparent and sustainable system.</p>
NO 02	KARIMIKUI, <u>KENYA</u>		STORY
	<p>Origin: Kiringyaga, Kenya</p> <p>Producer: Karimikui Factory</p> <p>Elevation: 1,650M</p> <p>Process: Washed</p> <p>Variety: SL28 & SL34</p> <p>Taste: Notes of Black currants,</p>		<p>The Karimikui Coffee Factory was established in 1966 and rests on a 6 acres piece of land serving the villages of Githureia, Gituba and Kiamugumo. Currently it is affiliated to Rungeto Farmers Cooperative Society (FCS), in an area where most smallholder farmers are growing tea, not coffee. The farmers here are mainly growing SL28 and SL34, accounting for 99% of the total coffee production, while we see some occasional Ruiru 11 plants.</p>
NO 03	BILDIIMOO, <u>ETHIOPIA</u>		STORY
	<p>Origin: Kebele, Werka - Ethiopia</p> <p>Producer: Nensebo Farmers</p> <p>Elevation: 1,900 - 2,000M</p> <p>Process: Washed</p> <p>Variety: Ethiopian Heirloom</p> <p>Taste: Notes of nectarine, jasmine and brown sugar</p>		<p>Bildiimoo is a privately owned communal wet mill in Nensebo – West Arsi, collecting cherries from various smallholders. Nensebo is one of the districts in the Oromia region in Ethiopia. Hills and mountain ranges characterize 70% of this district; the rest consists of arid lands and plateaus. Only 4,6 % of the population have access to natural drinking water. Coffee is an important cash crop with over 5,000 hectares planted. The total production is about 10 containers a year. They generally do lot separation based on 150 bags of parchment, equal to 100 bags of green coffee.</p>
