SLF-2 SiM™ Panel

SLF-2 Wall Panels are excellent low-frequency, sound-absorbing panels. SLF-2 panels are covered in your choice of fabrics and may be used in conjunction with our other fabric-covered, sound-absorbing products.

Our SLF-2 panels are designed for areas that require sound absorption in the low-to-middle frequencies while preserving higher-frequency sound. Choose SLF-2 panels for places such as performance halls, critical listening rooms and home theaters.

Specifications:

- **Facing:** Vinyl Bass Trap
- **Backing:** 6-7 pcf fiberglass, 2” thick
- **Sizes:** Custom sizes and shapes up to 4’x12’
- **Mounting:** Adhesive, impaling clips, two-part Z-clips
