Science and Health Projects

Bio Science Building (at left)

Michigan State University - East Lansing, 132,000 sqft, \$65 million Laboratory Building
AIA Detroit honor award winning bio-medical laboratory and research building. The four story composite steel construction was expedited through structural steel shop drawings prepared during the CD process.

University of Michigan Health System

Ann Arbor, Michigan campuses

SDI Structures serves UMHHS with ongoing consulting services including facility evaluations, estimating, and project planning, as well as construction documents and construction administration for numerous projects.

Queen Lillian Medical Office Building

Wayne State University - Detroit, Michigan 63,000 sqft, \$18 million Medical Offices

Five story composite steel framed office building in Midtown Detroit medical district. Steel shop drawings were prepared and reviewed as part of the construction document scope of work

West Ann Arbor Health Center

Ann Arbor, Michigan

75,000 sqft, \$46 million Outpatient Center

Two story steel framed health center serves as clinical outpatient facility for cardiology, gastroenterology, neurology, ophthalmology and psychiatry, as well as infusion, radiology and diagnostic imaging services.

S.T. Dana Building

University of Michigan - Ann Arbor, Michigan 20,000 sqft, \$25 million renovation.

This Courtyard infill and atrium roof project reclaims space for School of Natural Resource science programs and was granted national honors for innovation by the American Institute of Steel Construction.
