

Marlborough Sounds Restoration Trust

21 November 2016 WILDING PINE PROGRAMME REPORT

The following work has been completed since August.

QUEEN CHARLOTTE SOUND

Follow-up control of seedlings and missed trees at Onahau Bay has progressed over October and November. High densities of seedlings were encountered in places, particularly where trees had been felled previously. This work is primarily being funded by two Onahau landowners.

Follow-up control was also undertaken at The Snout, where trees had previously been felled by Marlborough Lines. Once again, landowners contributed to this work.
