

Priority Projects for Shoreham

Shoreham Community Association

Project heading	Shoreham Roadsides
Purpose	<p>To bring an attentive focus to the state of roadsides, specifically the northern and southern entrances to Shoreham, as well as those within the Village.</p> <p>To achieve action by the MPS and Vic Roads in addressing the neglected state and invasive weeds that predominate the Shoreham area. It is noted that the SCA has attempted to communicate with Vic Roads since 2011, but with a poor response.</p> <p>The project group to invite relevant parties to meet and to address this matter in order to initiate a strategy and management plan for Shoreham Village roadsides. The major objective is to get immediate action at both entrances to Shoreham from the Frankston – Flinders Road. The secondary objective is an action plan with early implementation for Byrnes Road, Cliff Road and Marine Parade</p>
Project members	Peter Kelly (Convenor) Sue Boggan
Projected timeline	5 year plan through 2013- 2018. To be reviewed as necessary
Collaborative organisations	Alan Willie VicRoads, Samantha Dalla Santa, MPS and Greg Powell, Manager of Infrastructure Maintenance MPS.
Community consultation	Shoreham Community Shoreham Foreshore Committee Others as appropriate

Challenges to this project include:

1. Responsibility of matters to be addressed and works to be carried out tend to be passed over between MPS and VicRoads. The SCA expect to meet with relevant parties to discuss the project and resolve organisational responsibilities for taking action.
2. Volunteers are discouraged from taking action on roadside work unless under a relevant authority and with appropriate insurance cover. This matter requires clarification and a procedure established

April 2013
