

**1** Identify your valve stem type

<b>SCHRADER</b>	<b>PRESTA</b>
<b>PUMP HEAD INTERNAL PARTS ARRANGEMENT</b>	
REVERSIBLE	

This Zefal mini pump is set for Schrader valves from the factory

First identify what style valve stem the bicycle has. Unthread the metal cap on the pump head opening and remove the internal parts. Arrange the internal parts to match your valve type as shown. Insert the internal parts and thread the metal cap back onto the pump head.

**2** **BRACKET MOUNTING**

1. Mount the pump bracket to the existing water bottle holes on your bike's frame using the hardware provided with your bike.
2. Snap the pump into the bracket. Wrap the hook and loop strap over the pump, through the buckle and back onto itself to help secure the pump during use.

**3**

Periodically lubricate the pump shaft with a couple drops of oil

**4**

To lock pump handle: Make sure pump handle overlaps the rubber sleeve "A"
