

CONTENT SOLUTIONS FOR PUBLISHERS

Innovate. Automate. Collaborate.

Industry leading turnaround times that support the entire content life cycle

Cenveo Publisher Services can manage all or just part of the publishing workflow with complete commitment to quality and innovation. Using automated production tools, we create, validate, and transform content into any format you need to reach your audience. With a combination of US support operations and full-service India operations, we provide a 24 x 6 editorial and production operation.

CONTENT DEVELOPMENT

Research and writing that ensures consistent and clear demonstration of subject matter. Dedicated subject matter experts manage and produce content through the entire workflow.

PRODUCTION MANAGEMENT

We provide industry-leading editorial and production solutions that fit your budget and improve your deadlines. From development to final deliverables and every step in between, we partner with publishers and bring ideas to market.

eLEARNING

We create and deliver eLearning products for all types of content. With an integrated workflow, our digital services parallel print production, with digital products available before print publication.

WORKFLOW AUTOMATION

We can improve turnaround times and establish quality checkpoints with our automated tools and processes. Automated transformations are built into our tools to provide consistent rendering of content.

PEER REVIEW

Manage the peer review process with speed and accuracy. A solid peer-review management system frees publishers to focus on scientific research and quality content for the scientific community.

AUTHOR SERVICES

An administrative tool to collect publication fees, manage reprint and eprint orders, and engage new society members. No fees to set up and administration is completely automated. Establish an ecommerce component to your publication with ease.

REPRINTS & ePRINTS

An online ecommerce and delivery platform to order, process, and manage reprint and eprint orders. Available to rollout in both a browser platform or iPad application with custom branding based on your design specifications.
