

2011 Resource Recycling Conference Exhibitors

AbiBow Recycling, LLC

Houston, Texas
Ph: 800-874-1301
Website: www.paperretriever.com
www.ecorewards.com
Booth Number: 103

AbiBow Recycling, LLC is among the largest recyclers of old newspapers and magazines in North America. The company has paper collection operations and related assets in 23 metropolitan centers across the United States and in the province of Ontario, Canada. The Company currently handles over 1 million metric tons of recyclable materials each year, of which about 75 percent is old newspapers. Recycling collection services are provided through two key programs – PaperRetriever and EcoRewards.

Association of Postconsumer Plastic Recyclers

Washington, D.C.
Ph: 202-316-3046
Website: www.plasticsrecycling.org
Booth Number: 409

The Association of Postconsumer Plastic Recyclers represents companies who acquire, reprocess and sell the byproduct of more than 95 percent of the postconsumer plastic processing capacity in the United States, Canada and Mexico. APR's membership includes numerous recycling companies, consumer product companies, equipment manufacturers and organizations committed to plastics recycling. The organization strongly advocates the recycling of all postconsumer plastic.

Avangard Innovative

Houston, Texas
Ph: 281-582-0700
Website: www.avaicg.com
Booth Number: 301-302

Avangard is a premier sustainable solutions provider, with branch offices and operating plants located around the world. Avangard Innovative works closely with clients to provide solutions and services that help achieve their social and environmental goals. In addition to being one of the largest recyclers in North America, Avangard Innovative's core services include: recycling solutions, processing/recycling facilities, equipment solutions, environmental and industrial services, resin distribution and sustainable products.

BACE, LLC

Charlotte, North Carolina
Ph: 877-506-2223
Website: www.bacecorp.com

Booth Number: 211

BACE is a leading manufacturer of heavy-duty balers and compactors used in the recycling and waste management industry. They are committed to being the best choice for a growing and prestigious customer base by providing an industry leading price, a solid warranty and exceptional delivery times.

Balemaster

Crown Point, Indiana
Ph: 219-663-4525
Website: www.balemaster.com

Booth Number: 106

Balemaster manufactures heavy duty horizontal Balers for the recycling industry. Balemaster Balers are designed to bale all forms of recyclable materials including OCC, ONP, aluminum cans and plastic bottles. Balemaster will be featuring its “Fat Boy” baler model, capable of making a 4000 lb bale of OCC. All Balemaster balers include many advanced features to provide maximum throughput capacity.

Bulk Handling Systems

Eugene, Oregon
Ph: 541-485-0999
Website: www.bulkhandlingsystems.com

Booth Number: 410

Bulk Handling Systems (BHS) is an innovative, worldwide leader in the design, manufacturing and installation of sorting components and systems for the solid waste and recycling industries. Companies and municipalities throughout the world have selected BHS because of its experience, dedication to cutting-edge technology, quality construction and unmatched customer service. The company’s custom-tailored systems reduce labor costs and increase material throughput and recovery rates, creating efficient and economical operations. Markets served include MSW, single- and dual- stream recycling, construction and demolition waste, plastic recycling, waste to energy and green waste and food waste.

What's next.

Busch Systems International, Inc.

Barrie, Ontario

Ph: 800-565-9931

Website: www.buschsystems.com

Booth Number: 206

Busch Systems is North America's leading manufacturer of recycling, waste and composting containers. For over 25 years, Busch Systems has led the way with innovative container designs. The world's largest line of recycling containers enables it to have exactly the right system for every diversion program. With over 100 years of combined recycling program experience, Busch's recycling consultants are pleased to share their expertise to make any program a great success. As part of its commitment to the environment, all of the company's products are made with a minimum 35 percent recycled content. Busch Systems is recycling made simple.

Call2Recycle

Atlanta, Georgia

Ph: 678-419-9990

Website: www.call2recycle.org

Booth Number: 306

Call2Recycle helps people and businesses care for the environment through its network of 30,000 battery and cell phone collection locations, including many major retail partners, across North America. A world leading recycling program, Call2Recycle has diverted over 60 million pounds of rechargeable batteries and cell phones from local landfills since its inception in 1996. Consumers, businesses and municipalities count on Call2Recycle as a way to dispose of a growing source of household waste, support green business practices, and fulfill their mission for a more sustainable earth. The free program meets or exceeds the most rigorous recycling standards in the world.

Carton Council

Ann Arbor, Michigan

Ph: 800-517-9634

Website: www.recyclecartons.com

Booth Number: 403

As a group of carton manufacturing companies – Elopak, Evergreen Packaging, SIG Combibloc and Tetra Pak – The Carton Council is proud that its products have among the lowest environmental impact within the packaging industry. It seeks to reduce this impact further by expanding recycling programs across the country and continuously improving our environmental performance.

Coll Materials, LLC

Zanesville, Ohio

Ph: 740-452-5691

Website: www.collmaterials.com

Booth Number: 110

Coll Materials is a post-industrial and post-consumer plastic recycling company. It recycles many grades of plastic including HDPE, PP, ABS, TPO, PET, and other engineered resins. The process is simple: Coll takes plastic scrap and manufactures it into post industrial regrind flake and post consumer pellet for plastic manufacturers to reuse in new products.

CP Group

National City, California

Ph: 619-477-3175

Website: www.thecpgroup.us

Booth Number: 407

The CP Group offers turn-key service for most Material Recovery Facility applications. Comprised of four companies, CP Mfg.; MSS, Inc.; KrauseMfg.; and IPS Balers, CP Group offers a full line of equipment including screens, conveyors, trommels, wet separators, optical sorting and balers, which can expertly and efficiently sort recyclable material: MSW, WtE, C&D, single-stream, dual-stream, etc. CP Group will design, manufacture, ship and install clients' complete systems, providing them with the most effective technology available with the best fit and finish in the industry.

Curbside Value Partnership

Arlington, Virginia

Ph: 703-358-2960

Website: www.recyclecurbside.org

Booth Number: 310

The Curbside Value Partnership (CVP) is a national 501c3 organization dedicated to helping communities grow participation and volume in their curbside programs through education. Since 2005, CVP has helped over 27 communities and four states develop, launch and measure effective education campaigns. CVP is always looking for interested and qualified partners and also offers free education resources, templates and a best-practices newsletter to all communities. Stop by the CVP booth to find out more or visit www.recyclecurbside.org.

Custom Polymers PET, LLC

Athens, Alabama

Ph: 256-232-3543

Website: www.CustomPolymersPET.com

Booth Number: 204

CUSTOM POLYMERS PET, LLC
Recycle. Different.

Custom Polymers PET, LLC is a premier recycler of post-consumer and post-industrial PET. The company works directly with material recovery facilities and manufacturers, adding value to

their scrap and diverting millions of pounds of plastic from landfills. Processing more than 180 million pounds of PET annually, Custom Polymers PET washes and pelletizes in-house which makes its products manufacture-ready. To learn more about their services of products, please visit www.custompolymerspet.com.

Davis-Standard, LLC

Pawcatuck, Connecticut

Ph: 860-599-1010

Website: www.davis-standard.com

Booth Number: 404

Davis-Standard, LLC supplies a complete line of reclaim extruders and systems for post-industrial and post-consumer processing. This includes reprocessing capabilities for low and high bulk density scrap, flake, chip, fiber, foam and film, plus solutions for heavy volatiles and moisture. It offers complete systems from scrap to pellet for reprocessing and reclaim under the Davis-Standard and Merritt Extrusion brands. Systems include Ram Stuffer, Scraper, Polycycle, Dual-Diameter and Cascade extrusion.

Earth911, Inc.

Scottsdale, Arizona

Ph: 480-889-2650

Website: www.earth911.com

Booth Number: 210

Earth911 is an environmental services company that addresses products' end-of-life solutions for both businesses and consumers. More than any other company, Earth911 directs consumers to local recycling program drop-off locations and pickup services through its website Earth911.com. Its 1-800-CLEANUP automated phone system and Earth911's Recycling Directory allows national retailers, local governments, private companies and others within the recycling space the opportunity to reach an audience already engaged in product stewardship.

Ecosafe Zero Waste

Surrey, British Columbia

Ph: 604-560-5133

Website: www.ecosafezerowaste.com

Booth Number: 312

EcoSafe Zero Waste advocates for cradle-to-cradle solutions for source separation of organics and recyclable collection focusing on organics as a feedstock for commercial compost facilities. For more information please call Ric Mallett at (604) 603-1759 or Doug Hill at (289) 987-4567.

Emerge Knowledge

Winnipeg, Manitoba

Ph: 204-772-7239

Website: www.emergeknowledge.com

Booth Number: 100-101

Emerge Knowledge provides Governments and Organizations with best practice web-based solutions for recycling and solid waste data measurement, reporting, and knowledge sharing. The company helps clients bridge the gap between environmental data and the information needed to improve programs, connect to community, and achieve sustainability goals. Building on eight years of success serving clients and over 13,000 Re-TRAC and MyEcoVille users, EmERGE is proud to launch Re-TRAC Connect, a fully-scalable solution for local governments who want a high impact waste reduction measurement system.

Envision Plastics

Reidsville, North Carolina and Chino,
California

Ph: 336-342-4749

Website: www.envisionplastics.com

Booth Number: 308

Envision Plastics is a national supplier and producer of recycled high-quality HDPE resins. Envision Plastics is proud to offer EcoPrime, the first FDA-approved HDPE resin meeting the standards for packaging all manner of food grade items to include milk, juice, vitamins, personal care products, etc. Envision Plastics' PRISMA technology provides color-specific resins made to the customers' specifications. Envision Plastics is located on both coasts, with nationwide shipping capabilities.

Evermore Recycling

Nashville, Tennessee

Ph: 877-932-9822

Website: www.evermorerecycling.com

Booth Number: 209

Evermore Recycling LLC is a new, independent company formed by Novelis and Alcoa for the procurement of used aluminum beverage cans (UBCs). Evermore is designed to create value by increasing efficiency, building stronger supply relationships and increasing recycling.

Gala Industries, Inc.

Eagle Rock, Virginia

Ph: 540-884-2589

Website: www.gala-industries.com

Booth Number: 402

Gala is the global leader for application technology of underwater pelletizers and centrifugal dryers for the plastics industry. Gala's underwater pelletizing systems can be used for post-industrial recycling applications, and their centrifugal dryers are often used in large post-consumer scrap conversion lines downstream of size reduction and wash/dry processes. More than an equipment manufacturer, Gala brings its customers the experience and process technology needed to remain competitive in today's business environment, and unprecedented commitment to customer service before, during and after the sale.

Gemini Corporation / Sigma Recycling, Inc.

Norcross, Georgia

Ph: 678-497-5170

Website: www.geminiCorp.be

Booth Number: 213

Sigma Recycling, Inc. and associated company Gemini Corp. NV have more than 100 professionals around the world to add value to their worldwide trading operations. Sigma's main divisions are recyclable plastics, shredded steel and wood. The company operates worldwide including China, India, Vietnam, UAE, UK, U.S. and Europe. Sigma re-invented trading and is committed to meet customer requirements and enhancing customer satisfaction through continual improvement of services and quality management.

Greenstar Recycling

Houston, Texas

Ph: 713-965-0005

Website: www.greenstarrecycling.com

Booth Number: 304

Greenstar is one of America's recycling leaders, providing cost effective and quality driven programs for several grades of recyclable material. Greenstar processes and prepares recyclables for shipment to local and international recycling markets. Greenstar is a leader in the field of single-stream processing which eliminates the need for residents to sort their recyclables; everything can be mixed in one bin for curbside collection. Single-stream decreases the cost of collection and increases the convenience of recycling.

Herbold Meckesheim USA

Smithfield, Rhode Island

Ph: 401-232-3354

Website: www.herboldusa.net

Booth Number: 104

Herbold Meckesheim USA is a world leader in the manufacture and installation of a wide range of size reduction equipment for the plastics and recycling industries. The products are used in a variety of applications ranging from traditional to innovative and include: Granulators, shredders, pulverizers, plastcompactors, and fully-integrated wash line systems.

Hoosier Recycling, Inc.

Lafayette, Indiana

Ph: 317-356-3227

Website: www.hoosierrecycling.com

Booth Number: 411

Hoosier Recycling specializes in recycling post industrial plastics. The company is fully equipped with shredders, densifiers for flexible plastics and expanded polystyrene, and specialized balers for PET bottles and aluminum cans. Hoosier Recycling is unique in that most of the materials it processes are used in the manufacturing of products for the Packaging Industry. The company provides recycling audits and consultation for clients to establish in-house recycling programs. Wit has assisted several of our clients to attain a zero landfill recycling program. Hoosier Recycling offers a full line of balers and shredders for steel and plastic strapping.

Hustler Conveyor Company.

O'Fallon, Missouri

Ph: 636-441-8600

Website: www.hustler-conveyor.com

Booth Number: 212

For 50 years, Hustler Conveyor Company has designed, manufactured and provided the most economical and cost effective solutions for your recycling needs. Hustler offers a full line of equipment which includes drum feeders, OCC separators, news and mixed paper screens, fines screens, conveyors (steel belt, roller chain, flat sliders, trough and flat idlers) platforms, magnets and eddy current separators. Its capabilities include initial design, engineering, fabrication, delivery and installation of your system.

Keep America Beautiful

Washington, D.C.

Ph:

Website: www.kab.org

Booth Number: 112

A long-standing grassroots nonprofit organization, Keep America Beautiful (KAB) combines education with hands-on stewardship to create cleaner, greener communities. Through the power of over 3 million volunteers and more than 1,200 affiliates and participating organizations, KAB motivates individuals, businesses, and government to find solutions that reduce waste, promote recycling, prevent litter, and improve communities. America Recycles Day, the only nationally recognized day to celebrate recycling, is a KAB initiative. Its newest program, Recycle-Bowl, launches this fall. Inspired by RecycleMania, a successful recycling competition for colleges administered by KAB, Recycle-Bowl is the first nationwide recycling competition for K-12 schools.

Kewanna Screen Printing

Kewanna, Indiana

Ph: 800-348-2454

Website: www.kspprints.com

Booth Number: 208

Kewanna Screen Printing (KSP Prints) produces durable decals, labels, and tags for the fire, waste and recycling, sanitation, safety and manufacturing industries. Quality products at competitive prices shipped to our customer quickly, is how the company built a solid reputation over the last 49 years. Plus clients get the attentive service you'd expect from a customer centered small business. Customers can get their company name, toll-free number, and /or logo on the surface of their choice, and can also choose from one of the company's many stock decals. It carries a large supply of waste, recycling, fire, and safety labels on hand at all times. Because it prints bulk quantities of its stock decals, it is able to sell these to customers at extremely competitive prices. Call or email about ordering custom decals and labels.

Lighting Resources LLC

Indianapolis, Indiana

Ph: 317-888-3889

Website: www.lightingresourcesinc.com

Booth Number: 311

Lighting Resources LLC is a provider of recycling services, including proper disposal of lamps, ballasts, PCBs, mercury devices, electronic waste, batteries and some other miscellaneous products. LRL provides lamp recycling solutions that are second to none. Its facilities have been designed to accept intact and pre-crushed lamps of all sizes and types to convert them properly. In addition, the company has a retort process to separate out the elemental mercury. LRL also has a prepaid recycling program named EZ on the Earth. This is an effective streamlined service for those far reaching, difficult to manage, or smaller sites. LRL plays a vital role in keeping the environment free of unnecessary contaminants with five sites around the country, including; Ontario, CA; Phoenix, AZ; Ocala FL; Fort Worth, TX; and Greenwood, IN. Visit www.lightingresourcesinc.com for more information.

Machinex Technologies, Inc.

Chicago, Illinois

Ph: 773-867-8801

Website: www.machinex.ca

Booth Number: 305

Machinex uses innovative solutions to design and produce custom-made sorting and recycling technologies for material recycling facilities, municipal solid waste and construction & demolition debris. Machinex provides clients the system they need - dependable, durable, high-performance equipment tailored to specific requirements. Machinex also offers a full range of high quality recycling equipment such as optical sorters, conveyors, balers, disc screen separators, shredders, compactors, and more.

Booth Number: 113**Metal Conversion Technologies, LLC**

Cartersville, Georgia

Ph: 678-721-0022

Website: www.metalconversion.com

Metal Conversion Technologies, LLC is a family owned and operated business that provides superior customer services. Since 2003, Metal Conversion Technologies has grown to be the second largest rechargeable battery recycler in North America and has recycled more than 2,000 tons of batteries. They are on track to recycle an additional 1,100 tons this year.

Moore Recycling

Sonoma, California

Ph: 707-935-3390

Website: www.moorerecycling.com**Booth Number: 500**

Moore Recycling Associates, Inc. has over 20 years of consulting and management experience in post-consumer materials recycling; providing short and long-term strategic, technical and management services. Moore Recycling's primary area of expertise is in packaging, especially plastic packaging. Moore Recycling brings a complex understanding of plastic packages' lifecycle: From collection to recycling infrastructure and end-use markets. Moore has offices on both coasts to service clients' management, research, and program operation needs. They take pride in accurate, high-quality work and client satisfaction.

National Recycling Coalition (NRC)

Washington, D.C.

Ph: 202-618-2107

Website: www.nrcrecycles.org**Booth Number: 107**

The Mission of the National Recycling Coalition is to partner with and facilitate activities between and among non-profit organizations (NGO's), businesses, trade associations, individuals and government to maintain a prosperous and productive American recycling system that is committed to the conservation of natural resources.

Nexgen Balers

Vernon, Alabama

Ph: 800-633-8974

Website: www.nexgenbalers.com**Booth Number: 413**

NEXGEN is the premier provider of solutions for today's recycling, solid waste and material handling challenges. Through innovative products, industry expertise, and superior service, NEXGEN is the partner of choice for businesses and municipalities who need to efficiently process solid waste and recyclables. From clothing donation centers and retail stores, to recycling centers and material recovery facilities, NEXGEN balers, separating equipment, and conveyors lead the way in productivity and throughput. The company's skilled engineers can help you design the right sized system for clients' needs, and will be onsite through installation and startup to ensure they achieve the desired results.

Norseman Environmental Products

Oconomowoc, Wisconsin

Ph: 262-560-5364

Website: www.norsemanenvironmental.com

Booth Number: 109

Choose from Norseman Environmental brand of curbside collection recycling boxes, organic recycling bins, the SYSTEM Rain Barrel and the Earth Machine backyard compost bin to improve recycling rates, conserve natural resources and help the environment. The Norseman brand of products, now from ORBIS Corporation, has been preferred by municipalities and haulers in the U.S., Canada and beyond for decades. Norseman Environmental understands how recycling and diversion programs work. Norseman's team of experts work with municipalities and haulers to identify recycling/diversion goals, and assists in planning curbside recycling or diversion programs to meet the needs of residents. Please visit www.norsemanenvironmental.com for more information.

OmniSource

Fort Wayne, Indiana

Ph: 260-422-5541

Website: www.omnisource.com

Booth Number: 111

OmniSource is a multifaceted metals-recycling company, one of North America's largest processors and distributors of scrap and secondary metals. It collects, processes, and resells a wide variety of scrap metal. Through recent expansions and acquisitions, OmniSource can now process seven million tons of ferrous scrap per year and more than one billion pounds of nonferrous metals. The company currently operates more than 70 collection and processing facilities, including 11 high-capacity shredders as well as other metals processing facilities, and employs about 2,500 people.

PELLENC ST America, Inc.

Concord, California

Ph: 925-890-8350

Website: www.pellencst.com

Booth Number: 401

Pellenc ST develops, produces and markets optical sorting machines for household and industrial

wastes. The technologies used to sort these materials are near infrared, middle infrared, vision and induction technologies. Thanks to Pellenc ST, sorting solutions are highly valuable in the recycling industries. The company is actively developing new sorting solutions in the area of municipal solid waste, construction and industrial waste treatment. Renowned firms in more than 40 countries all around the world have installed Pellenc ST machines. For further information go to www.pellencst.com.

Perry Johnson Registrars, Inc.

Troy, Michigan
Ph: 800-800-7910
Website: www.pjr.com
Booth Number: 405

Perry Johnson Registrars, Inc. (PJR) is a full-service registrar that carries multiple international accreditations. PJR has the authority to register organizations, recognizing them for their quality management system's integrity. At PJR, they understand the importance of ISO 9000 registration and are dedicated to helping an organization achieve its goals.

Petoskey Plastics

Petoskey, Michigan
Ph: 800-999-6556
Website: www.petoskeyplastics.com
Booth Number: 207

Since 1970, Petoskey Plastics has been an innovator in manufacturing blown plastic film and bags that are engineered for performance. Petoskey is an industry leader supplying the automotive, recycling, food, retail, packaging, and construction industries with engineered solutions that meet specific needs. The company first began recycling in 1978 and has never stopped thinking green. The company's Greencore Solutions closed-loop recycling program takes post-use plastic out of the waste stream and puts it back into customer products. Thanks to its exclusive, multi-layer manufacturing process, Petoskey is supplying its customers with high-performance polyethylene products that are good for them and good for the environment.

Plastic Advanced Recycling Corporation

Willowbrook, Illinois
Ph: 630-655-6976
Website: www.plastic2x.com
Booth Number: 203

Plastic Advanced Recycling Corp. (PARC) is a recycling technology R&D company, located in Illinois. The company developed a patent protected plastic-to-fuel conversion technology, as

well as equipment for continuous high-volume fuel production. PARC's zero-pollution conversion technology provides practical solutions to the increasing environmental issues caused by waste plastic.

Polyad Services LLC

Earth City, Missouri

Ph: 314-506-3116

Website: www.polyadservices.com

Booth Number: 406

PolyAd Services Inc. offers standard and customized additive solutions helping give new life to recycled plastics. As polymers follow their life cycle from synthesis to service life the additives incorporated into them to impart stability to compounding, processing and service life are degraded. By the time they reach a recycling facility they may have little of the original stability left. Contamination with non-target resins and other materials may further contribute to the resultant PRC being unsuitable for a particular application. RECYCLOSTAB, RECYCLOSSORB and RECYCLOBLEND products can help recycled plastics perform better. Based in St. Louis and Lamperttheim, Germany, PolyAd Services has sales offices distributed throughout NAFTA, Europe and Asia.

ReCommunity

Charlotte, North Carolina

Ph: 607-437-8820

Website: www.recommunity.com

Booth Number: 201-202

ReCommunity is a recovery leader in dozens of forward thinking communities, enabling them to aggressively divert as many recyclables as possible from their waste streams. The revolution is not just about maximizing diversion and emptying landfills, it's about filling communities with new green jobs, additional materials, extra revenues and sustainable partnerships. ReCommunity's expertise in single-stream recycling education and promotion, commodity marketing, turnkey construction and operations, and its development efforts for future production of engineered fuel from waste is making a difference in neighborhoods across America.

Booth Number: 309

Republic Machine, Inc.

Louisville, Kentucky

Ph: 502-637-6778

Website: www.republicmachine.com

Republic Machine is a leading designer and manufacturer of single-shaft shredders. The company has produced over 250 single-shaft shredders, introducing a number of design innovations that have enhanced the shredders cutting, product feed, power train and control system.

RONA (Recycling Organizations of North America)

Denver, Colorado
Ph: 303-975-6975

Website: www.recyclingorganizations.org

Booth Number: 502

Recycling Organizations of North America (RONA) was created as a resource for like-minded local, state and national organizations to support, enhance, teach, share, encourage, develop, grow and sustain recycling in North America. RONA will help organizations work together to develop and spread best practices and resources to facilitate the growth of the industry and sustainable practices. Please join them in building a strong coalition throughout North America and sharing your knowledge and experience with others.

Resource Recycling, Inc.

Portland, Oregon
Ph: 503-233-1305

Website: www.resource-recycling.com

Booth Number: 501

Resource Recycling, Inc. is the publisher of Resource Recycling, E-Scrap News and Plastics Recycling Update, and is the primary sponsor of the Resource Recycling Conference, the E-Scrap Conference and the Plastics Recycling Conference.

Rowe Equipment, Inc.

Cypress, Texas
Ph: 281-255-0555

Website: www.roweequipment.com

Booth Number: 307

Rowe Equipment, Inc. / No Dust Filtration Products, Inc. is a manufacturer and distributor of extruder screens, pelletizer blades, granulator blades, shredder blades and wire mesh. The company manufactures to ISO standards and stocks many of its products for immediate delivery. The company is a leading supplier of blades for Gala, Berringer, Erema, Gamma, and NGR, and supplies shredder blades for Vecoplan and Weima. Rowe Equipment / No Dust Filtration manufactures screen packs for plastic extrusion and blown film industries for clients using Extec, Gneuss, Erema, Xaloy/Key filters. The company also manufactures bag house filter bags, liquid filtration bags and air filters.

RRT Design & Construction

Melville, New York
Ph: 631-756-1060

Website: www.rrtenviro.com

Booth Number: 105

RRT Design & Construction (RRT) is one of the nation's leading providers of engineering and construction services to solid waste management and recycling companies and municipalities. For over 20 years, RRT has provided turnkey services for over 300 projects including 70 new facilities built in 27 states and Canada and proudly continues as a market leader of highly advanced recycling facilities.

S+S Inspection, Inc.

Bartlett, Illinois
Ph: 224-208-1900

Website: www.sesotec-usa.com

Booth Number: 205

S+S Inspection provides engineered sorting solutions for the plastics and recycling industries. The company designs and manufactures the widest variety of metal detectors and optical sorting technology on the market. S+S specializes in providing custom solutions to solve the most demanding needs.

Booth Number: 412

Strategic Materials, Inc.

Cleveland, Ohio
Ph: 330-752-5605

Website: www.strategicmaterials.com

Strategic Materials (SMI) is a leading North American recycling company, with facilities located across the United States, Canada, and Mexico. SMI is the largest glass processor and one of the top ten independent plastics processors in North America. SMI operates three divisions: Glass Processing (the "Glass Division"), Plastic Processing (the "Plastics Division"), and Container Collections (the "Collections Division"). Strategic Materials sells approximately 2.0 million tons of glass cullet each year. Strategic Materials has an outstanding reputation in terms of product quality, customer service and integrity. The company collects scrap glass from a diverse range of sources, extending from residential collection programs to bottle and plate glass manufacturers.

Trex Company, Inc.

Winchester, Virginia
Ph: 540-542-6300

Website: www.trex.com

Booth Number: 303

Trex Company is the country's largest manufacturer of wood-alternative decking, railing and fencing products. Trex Company is headquartered in Winchester, Virginia, with manufacturing facilities in Fernley, Nevada and Winchester, Virginia. Trex turns millions of pounds of recycled and reclaimed plastic and waste wood each year into Trex products. Trex Company purchases approximately 300 million pounds of used polyethylene and an equal amount of hardwood sawdust each year. Trex recycles over 1.3 billion grocery retail bags annually.

UNICOR, Federal Prison Industries, Inc.

Washington, DC

Ph: 202-305-3768

Website: www.unicor.gov/recycling/index.cfm

Booth Number: 108

Since 1994, UNICOR has become one of the premier electronics recyclers in the country. We accept computer and peripherals, electronic equipment, obsolete electrical items, plus ferrous and non-ferrous metals. UNICOR's goal is to be a responsible steward of the environment by managing our recycling operations to the highest standards and operate in accordance with all applicable federal, state, and local EPA regulations. UNICOR's unique, full-service recycling program is an integrated part of the E-scrap solution.

Universal Recycling Technologies

Janesville, Wisconsin

Ph: 877-278-0799

Website: www.universalrecyclers.com

Booth Number: 313

Universal Recycling Technologies, LLC (URT) is a national electronics and universal waste recycling organization headquartered in Janesville, WI. URT provides end-of-life recycling (de-manufacturing), asset recovery services (ARS), universal waste recycling, and commodities, and logistics management services to major market segments including original equipment manufacturers (OEM), retailers, municipalities, and Fortune 500 organizations. URT's Janesville, WI campus is ISO 9001:2008, ISO 14001:2004 and e-Stewards certified. All of URT's nationwide locations are in process to be certified this year. Since 2007, the company has been privately owned by Hendricks Holding Company, Inc. To learn more, please visit www.universalrecyclers.com.

Van Dyk Baler

Stamford, Connecticut

Ph: 203-967-1100

Website: www.vandykbaler.com

Booth Number: 102

Incorporated in 1984, Van Dyk Baler is the exclusive North American distributor for Bollegraaf Recycling Machinery. Van Dyk works with clients to design custom recycling systems and solutions to meet the needs of their organizations. The company's key technologies include: High-capacity pre-press flab balers, drum feeders, ONP screens, paper magnets, paper spikes, TITECH optical sorting and shredders. Van Dyk's comprehensive portfolio contains many of the world's first and largest installations in the recycling industry, as well as the satisfied clients who operate them. Regional sales managers are available to provide custom designed solutions for any application.
