

OPEN GOVERNMENT PATHWAY

OGP

Australian Government

The Australian Government process and how citizens contributed to Australia's first Open Government Partnership National Action Plan.

The Open Government Partnership (OGP) is a global initiative created to help governments be transparent, accountable, responsive to citizens and fight corruption. Governments, civil society, and the private sector work together to develop ideas to implement ambitious open government reforms and commit to an action plan every two years. OGP coordinators and support units are on hand to help.
