

Walden Local Meat Co. Supplier Affidavit

I _____, certify and guarantee that the poultry that I am selling to Walden Local Meat Co. have been raised according to the following criteria:

- Chickens have never received antibiotics of any kind, whether injected or fed
- No animal byproducts or GMOs in feed
- No physical alterations, including beak trimming
- Chickens are raised outdoors, on pasture with at least 75% vegetative cover (after up to 4 weeks in a brooder) and moved regularly to fresh pasture
- Chickens are minimally handled prior to slaughter, and humanely handled in transport (never more than two at a time by a handler)
- Chickens are provided access to clean water at all times
- When sick birds are identified, they are segregated and quarantined from other birds until returned to health

Supplier Protocol:

- Chickens that appear sick, injured or otherwise abnormal are segregated from the group to an independent holding area separate from normal chickens. If chickens recover, they are returned to the main group of market animals. If they do not recover, or any antibiotic treatment of any kind is administered, these animals are not sold to Walden.
- I certify that we purchase chicks from independently certified antibiotic-free suppliers that do not use antibiotics pre-hatch and do not inject antibiotics in ovo, and I will provide records demonstrating this for each group of purchased chickens.

Signed on this ____ day of _____, 20__
