Walden Local Meat Co. Supplier Affidavit

I _____, certify and guarantee that the pigs or pork products I am selling to Walden Local Meat Co. (Walden) have been raised according to the following criteria:

Raising Protocols:

- Pigs are raised outdoors at all times during the growing season (at least 120 days annually), on pesticide & herbicide free pasture or forested areas, and rotated to new areas regularly to maintain vegetative cover;
- When in shelters during winter, pigs maintain continuous access to the outdoors except in extreme weather conditions (less than 10 days annually), and deep bedding ensures no visible concrete;
    - If pigs are restricted from pasture due to inclement weather, the minimum indoor bedded lying area must be 8.5sf/pig if under 100lbs, 12sf/pig if between 100-200lbs and 14sf/pig if over 200lbs;
    - Minimum outdoor loafing area (not covered) must be 4.5sf/pig if under 100lbs, 8.5sf/pig if between 100-200lbs and 11sf/pig if over 200lbs.
- Pigs sold to Walden are never given antibiotics, growth enhancers or hormones of any kind, whether injected or fed.
    - If antibiotics of any kind are used to treat illness for the comfort or safety of the animal, treated animals are fully segregated from Walden animals, and the animal tag is documented to ensure treated pigs are off of antibiotics for at least 30 days before slaughter and these animals are not sold to Walden
- **Feed Formulation**: all feed excludes all animal by-products; dairy products (e.g. dairy whey) are permitted.

Handling Protocols:

- Humane handling: Taildocking and detusking are never performed, and disk or septum nose rings are never employed;
- Electric prods are never utilized for handing; humane methods are used for transport, loading and holding;
- No market weight animals were purchased at auction.
