

Important to document management right after HD judgment

Press Release

March 29, 2016

Maria Hanbo has contributed in the latest edition of ERA magazine (no 2/2016) with the article "Viktigt dokumentera ledningsrätt efter HD-dom". The article comments on a recent judgment from the Swedish Supreme Court regarding rights of way for cabling in real property law.

The article argues how important it is to secure rights of way through easements agreements and registrations in cadastral registers. In that way, one can avoid future disputes concerning rights of use and ownership. ERA exclusively deals with matters of interest for the Swedish and Nordic electricity market.
