

OEBERGS assisted KumBro Vind AB in multilateral PPA Structure

Press Release

January 4, 2017

OEBERGS has assisted the municipality owned power generator KumBro Vind AB in the structuring of a long-term multilateral power purchase agreement which involves wind power.

KumBro Vind AB is owned by the municipalities of Örebro and Kumla. KumBro Vind AB is expected to generate over 100 GWh of wind power annually.

Offtakers are currently looking for long-term PPA commitments whereby pricing of energy can be locked in for the long term. This reduces the risk of price volatility. In this respect, this is a groundbreaking deal in which we are proud have played a role, says advokat Björn Öberg, lead counsel in the transaction.
