

## **Fortum Power purchases wind power companies in Ostrobothnia – engages in cooperation with Vindin Ab/Oy**

Press Release

July 4, 2017

Fortum Power and Heat Oy have purchased six planned wind farms in Finnish Ostrobothnia, and entered a close cooperation with Vindin Ab/Oy. OEBERGS has advised Vindin in the transaction and assisted in the development of the projects.

The transaction enables the companies to use their shared expertise to enhance the development of cost-effective wind power, and to strengthen their competitiveness in these areas.

Through the transaction, Vindin will maintain its activity in Ostrobothnia, and be responsible for the continued development of the six wind farms. Four of the six planned wind farms are located in Närpes, and the other two are in Poikel and Molpe in Korsnäs.

”Our mission is to enable the transition to a more sustainable society. We are both happy and proud to have contributed to this development on both sides of the Baltic Sea” says OEBERGS senior partner Björn Öberg, who represented Vindin.
