

# FOR IMMEDIATE RELEASE

November 20, 2015

## **Winners Announced for the 2015 Premier's Awards of Excellence in Design.**

Held in conjunction with Design Week, an event hosted by the Design Council of Saskatchewan (DCS) that took place from November 2 - 6, 2015, the Premier's Awards recognized outstanding applied design done right here in Saskatchewan.

The award categories were as follows: architecture, engineering & geoscience, graphic design, interior design, landscape architecture, planning, and integrated design (an integrated entry demonstrates significant involvement of three or more member associations throughout the project and cannot be entered in any other category).

The competition was open to certified individuals and corporate members in good standing with a DCS member association.

All entries were designed in Saskatchewan by Saskatchewan personnel and were completed within the two-year period prior to Design Week.

A jury composed of one representative from each member association (which can include invited guests from the Design Week Speakers Series) evaluated entries on criteria appropriate to each category.

All entries in the competition were displayed to the public during Design Week. At the conclusion of Design Week, on the evening of November 6, an awards ceremony was held, and the winning professional designers were presented with their awards. Congratulations to all.

## Winners of the 2015 Premier's Awards of Excellence in Design

**About the Design Council of Saskatchewan**

A volunteer organization formed in 1983, the Design Council of Saskatchewan is the collective voice of six provincial associations representing design professionals working in the disciplines of architecture, planning, engineering & geoscience, graphic design, interior design and landscape architecture.

It was established to promote public awareness and understanding of applied design. Hosting Design Week is a major initiative of the Council. It is an open invitation to the public to learn about the different areas of design through a speaker series and other events.

The Council also recognizes design excellence in Saskatchewan through programs such as the Premier's Awards of Excellence in Design. Held in conjunction with Design Week, a jury of design professionals assembled in Saskatoon reviews entries to the competition based on criteria specifically appropriate to each of seven categories. All entries are displayed to the public and a gala evening is held, where a professional designer from each association is presented with an award.
