

Connect to Caltech

Connect to the Future

Hire a Summer Intern

Caltech attracts some of the world's brightest undergraduates.

They come to gain a rigorous, broad education and to conduct research under the guidance of preeminent engineers and scientists. But there's one more important aspect to their training—and **a way that you can help**.

As Caltech's students look ahead to launching their careers, internships give them valuable opportunities to bridge the classroom and the working world. Through internships, students learn more about practical applications for their knowledge while **building expertise and connections** in the industries they aspire to join.

Summer internships benefit companies as well.

Internships give employers a head start on recruiting **top Caltech talent**. And in dynamic, quickly evolving industries, Caltech interns offer perspectives fresh from laboratories at the leading edge. These students are primed to take the problem-solving skills they have honed at Caltech and put them to work for you.

Hiring a Techer for the summer could be a win for your company.

Start the conversation today by contacting [Aneesha Akram](#), career counselor for internship development and advising, at aakram@caltech.edu or (626) 395-6900.
