Gen II Valve Blanks

Extreme Duty & Severe Duty® Series

- ▶ Hard Tips and Hardened Grooves
- ▶ No Need for Inserted Tips or Wear Caps

The procedure for ordering a custom valve is as simple as 1-2-3!

1. Select the blank appropriate for your finished piece based first on stem diameter.
2. Give us your final head diameter along with the seat and margin widths.
3. Specify the length of the valve you want, along with groove type and location.

* Part numbers with asterisks can be reduced 1.500" or 38mm, except P/N's 11223/11277 which can be reduced 1.800".

All others .800" or 20.32mm.

All Gen II custom stainless valve part numbers are priced to include all machining to render a finished valve provided that no more than .250" of material needs to be removed from the head diameter. If more than .250" of material is to be removed from the head diameter, then an additional machining charge P/N 04007 must be added to the price of the valve.

Manley Performance can manufacture titanium valves for just about any application imaginable. Servicing your custom requirements is our specialty; we do it every single day and typically 8 pieces at a time.

We inventory an extensive selection of blanks in varying stem sizes with the stem coating correctly positioned to properly fit the multitude of aftermarket cylinder heads available. This allows us to maintain reliable and very reasonable turnaround times (typically 10 working days) throughout the year. If by chance we don't have a blank in stock to match your particular application, then don't worry. We'll simply make it from one of our raw forgings. This will lengthen the lead-time to 6 weeks.

For any stem size, groove type, machined (dished) combustion face or special head shape or seat cut, we're here to service your needs. Our customers' prints are proprietary and confidential.

Fluted Dish

Ordering Manley Custom Titanium Valves is as easy as 1-2-3!

1. Refer to the blank valve print on page 45 of this catalog or on our website under the custom valve tab and fill in your desired specifications.
2. Please contact your inside or outside Manley salesperson to review your order.
3. Fax or email your approved prints to the factory for processing, specifying your account number, a purchase order number and quantity.

Custom Hollow Stem Titanium Intake Valves

- ▶ Precision gun drilling
- ▶ Smooth surface finish
- ▶ Full radius at end of bore, no stress raisers
- ▶ Able to utilize a hard tool steel tip on 5/16" and larger stem diameter valves
- ▶ Extremely lightweight - 10-12% weight reduction

Titanium Valve CrN Seat Face Coating

- ▶ High hardness and lubricity prevents valve seat face wear
- ▶ Prevents "trenching" of the seat face which maintains combustion seal
- ▶ Provides greater resistance to wear typically seen when valve float or dirt is present in the engine
- ▶ Better seal between the valve seat face and the seat in the cylinder head equals more horsepower

Manley Performance offers two CrN seat coating options: standard and premium (Calico). Both function perfectly; but the premium incorporates an advanced superpolish process rendering a jewel-like surface finish.

We offer certain shelf stock part numbers with CrN seat coating; look for the "C" suffix.

Titanium valve "tip" coating is also available for applications not utilizing a "press in" hard tip (prevents tip wear from lash cap).

Custom titanium valves with a premium CrN stem coating (in lieu of moly) are also available.

Contact your salesperson for ordering details
