

EcoDomo^{LLC}

Recycled Leather & Feature Walls

Make an elegant and subtle impression with EcoDomo leathers in feature walls.

EcoDomo leathers are the medium of choice for feature walls. Warmer than stone, leather is a natural and sustainable material suitable for elevator lobbies, feature walls, and the surrounding furniture. Install as full size sheets, pre-laminated panels up to 4'x8' in size, or wall tiles.

Our leathers can be customized with stitching, decorative brass detail, embossed with corporate logos, or laser-engraved to apply donor names. Made in the USA.
