

Phoenix Collection: Repurposed Belts

Create a sensational re-experience with artful and eye-catching leather belt panels!

EcoDomo's Phoenix Collection is entirely made of used leather belts which have been collected from Goodwill stores and donations from our partners. All the belts show wear and carry their own history. They are sorted by size, color, and style before being cleaned and processed for application on panels. Available in black, brown, or multi-color, the belt panels will make a whimsical and gorgeous statement within your designs. Sizes up to 4' x 8' mounted on flexible or a solid MDF substrate. You can use the belt panels for:

- Feature walls
- Doors
- Greeting stands
- Wall covering or accent pieces
- Benches

We will be glad to work with your designs to ensure the best application, value, and ease of installation for your project. Make sure to specify vertical or horizontal orientation of the belts in your drawings. Installs like acoustic panels. Made in the USA of re-purposed, used belts.
