## The Plus Size Tee of Your Dreams

Author: [Jen Anderson](#) • Discussion: [No Comments](#)

Why is it so hard to find a plain t-shirt in a flattering shape and color? It's not asking too much to want a well made tee that looks great on its own and also works for layering. It's one of the most basic pieces of clothes you could own. And yet...

Cushie b to the rescue. Cushie b's [High Low Short Sleeve T-Shirt](#) is flattering no matter what your body shape is. Pear shaped? The gentle flare gives you the extra room around the hips that you need. Apple shaped? This tee will skim over your tummy in the most flattering way possible. For inverted triangle shaped women, the flare makes your hips look wider, balancing out your top. And the fit and flare shape gives rectangles the illusion of a defined waist. And hourglass shaped women can wear this t-shirt to emphasize their curves without hugging them.

And that length! Just the thing. For many women, t-shirt length can be fraught. If a tee goes down to your low hip, chances are it'll be too tight across the hips and too loose around your waist. You could tuck it in, but too many plus size pants and skirts are made to be worn with untucked tops. If a tee hits you at your high hip, then you might be accidentally giving the world peeks at your belly (or your shape wear).

This tee covers your hips without pulling across them or looking baggy. Finally!

A scoop neckline (not too deep) is universally flattering. It also allows you to dress this top up or down. A v-neck can be too sporty to be versatile (or too alluring if it's a deep v). A crew neck can make a large bosom look matronly. But a scoop neckline can go to the office, a museum or a backyard cookout with just a change of accessories.

And the sleeves! Sleeves can be an even bigger headache than length. Far too many short sleeves hit you in a way that's anything but flattering. They're either too short or cut across the largest part of your bicep. But Cushie b's [High Low Short Sleeve T-Shirt](#) hits you in just the right spot. And since they're short, you can wear a jacket or sweater over this tee without having to worry about added bulk.

Far too many women's tees are made only for layering. The material is so cheap and flimsy that it's practically see through. So disappointing. This tee is made from heavy cotton lycra, so it'll hold its shape through wear after wear and wash after wash.

It's like Cushie b reinvented the t-shirt with plus size women's bodies in mind.

Cushie b's [High Low Short Sleeve T-Shirt](#) is available exclusively from Sophisticated Curves in Black and Mediterranean Blue.
