

NEUROSENSORY

Multi-sensory learning for children & adults with dyslexia, ADHD, ASD and other learning disorders

Neurosensory Assessments

Neurosensory is expert at identifying educational difficulties and learning disorders in children and adults.

As appropriate Neurosensory uses a range of norm referenced psychometric tests similar to those used by psychologists and educators around the world. These tests are generally the preferred assessment tool for the identification of educational difficulties and learning disorders.

A professionally conducted psychometric assessment assists in detecting and diagnosing a number of educational learning disorders including the following:

Developmental disorders

- Autism Spectrum disorders
- Asperger's Syndrome
- Related developmental disorders

Behavioural disorders

- Attention Deficit Hyperactivity Disorder (ADHD) and other behavioural disorders

Learning disorders

- Dyslexia and associated learning difficulties including language delay

Assessment for school and tertiary education

- Assessment for school readiness
- Assessment and support for special consideration at school and in the HSC and other exams

Referrals

- Neurosensory refers where appropriate.

Are you unsure which assessment if any is suitable?

Have you tried to help your child before without much success?
