## Coding from Scratch Ages 8 and Up Saturdays 1:00 PM

(12 Weeks only, starts TBD)

Students will learn basic coding techniques through interactive and exciting projects. The students will use "Scratch™" to create computational artifacts like games, animations, music composition and other applications using ideas from their lives and interests. The goal of this class is to increase fluency with computational thinking and programming concepts.

## Young Music Producers Ages 9-12)

Saturdays 10:00 am

## Music Producers Ages 13+

Saturdays 11:00 AM

In this class, students become music producers as they compose original tracks using professional, but easy to use, computer software and technology. No prior knowledge of music theory required, students will have fun learning the basics or making use of the skills they've developed in other classes. Students will explore their creativity as they layer beats, rhythms, and melodies with loops, sequencers, and synthesized sounds. There are so many instruments and effects that students can choose from, genres they can work in, and methods for orchestrating their songs, that every composition comes out unique.

## Advanced Music Producers

Saturday 3:00 PM

In this class, students gain in-depth, hands-on experience in areas of audio/MIDI recording, editing, mixing, and songwriting using computer software and music production techniques. Students will produce music in several popular genres using hardware/software instruments, loops, and effects. Ultimately, this class provides students with a fun and engaging opportunity to advance both their technical and creative music production skills. **Basic understanding of music production is highly recommended.**

## Composing and Songwriting at the Computer

Ages 13+, Sat. 3:00 PM

In this class, we will explore the fundamentals of music composition and songwriting using computer software namely, Finale and Logic Pro. Students will learn how to analyze classical and popular music, create songs in various styles and genres, and edit/mix them in Finale and Logic Pro. Our main goal is to provide students with basic composing and songwriting techniques that they can apply to their own works. There are no prerequisites for this course other than a good attitude and an interest in music. By the end of this course student will be able to:

- Create a song using Finale and Logic Pro
- Understand the basic forms and structure of classical and popular music songs
- Enhance and correct music sound quality using Logic Pro. Topics covered in this course:
- Song form/structure
- Style & genre
- Melody & harmony
- Chord progressions
- Rhythm & groove
- Lyrics

## Intro to Graphic Design

Ages 12+ (12 Weeks, starts, TBD)

Saturdays 2:00 PM

In this 12-week course you will learn what it means to be a creative thinker and to unlock your inner creative genius! You'll gain access into what controls our psychology and how our decisions and thoughts are controlled by what we see, hear, read and watch.

You will be able to bring your ideas to the table and bring them to life using the tools that the professionals use everyday. And you will leave the course with a higher understanding of the world around you.

Enter the Digital Age of Professional Creativity!

- Learn from working professionals how to create a brand from the ground up!
- Learn how value is created.
- Learn Skills that will make you stand out in today's job market
- Bring your projects and passions to life!

## Introduction to Digital Video Creation

Wednesdays at 6:00 PM

Nothing tells a story like video! By 2020, 82% of all on-line activity will be video streaming. Join the video revolution and learn how to start your own channel or make and edit digital videos that will amaze your friends, and clients

## Mobile App Design

Wednesdays at 5:00 PM

If you've ever had a great idea and thought that there should be an app for that; then this is the right place for you. In this class we will explore the world of app development so you can bring your ideas to reality.

## Advanced Coding and Video Game Design

Ages 13+, Monday 4:30 PM

If you're serious about video gaming but always wanted to learn to make them from scratch. Then you're in the right place, in this class you will create some of your very own games. Once we complete the games we will compete and see who's the king or queen of the arcade.

## Digital Photography

Ages 12+, Monday 5:30 PM

So you love taking pictures with the latest photo filters and post photos on your favorite social media channel. Why not learn how to take professional photos with your phone or camera that will take all of your photo sharing to a new level. Whether it is for a presentation or just for fun your pictures will look great. Bring your own camera or phone to class and let's have a blast.
