

Michigan Association of Traffic Accident Investigators

2012 Membership: *For \$40 what's in it for me?*

Let's start with the practical:

-As a member of MATAI you receive a 28% reduced price for both the Spring and Fall Conferences respectively. That's a potential savings of \$70.

-MATAI is proud to offer every member 6 electronic issues of the "Accident Reconstruction Journal" included in the cost of your membership. "ARJ" has been a leading International technical accident reconstruction publication for years and is a great resource for accident investigators and reconstructionists. This publication in its printed version would cost you \$80.00 for a one year subscription.

-"Reference Points" is a newsletter published by MATAI that is sent to its membership containing technical articles, book reviews, and follow-up pieces to our live crash test conferences.

What about the MATAI Conferences?

-Traditionally MATAI has held their Spring Conferences out in the field and the Fall Conferences in the classroom.

Since 2009, MATAI has conducted live, real-world, dynamic crash testing. It is an opportunity for attendees to witness live vehicle crashes from a very close distance. They can personally work the crashes at the scene and confirm that the principles they have been taught really work. This first-hand experience is unequalled.

At our follow-up conference we evaluate the data collected from the live crash tests. We discover what works, what doesn't, and why.

So come join us. We have members with experience levels from A to Z, beginners to retirees.

You will never feel uncomfortable or unchallenged and the cost of admission is unbeatable. It truly does pay for itself.
