SCIENCE. TECHNOLOGY. ENGINEERING. ARTS. MATH.

The Back-To-School Code-A-Thon

January 26th-28th, 2018

The Back to School Code-A-Thon is a FREE 48 hour program that gives students an opportunity to use technology, research, and collaborate to address issues and problems confronting the human race on a global scale. Students will work together to learn to code HTML, CSS, and JavaScript while learning to use tools like GitHub to build a website that reflects their ideas and commitment to problem-solving. Prizes are available for the teams that create the top three projects in their location! This is an international event, and students will be able to speak, work, and learn with other students around the world via live video, web, and telecommunication technology!

- Learn web development in a collaborative environment
- Meet students from around the world
- Get international visibility
- Find solutions to real global problems using technology

Locations Include:

New York: LaunchPad, Westbury, NY
Pennsylvania: Penn Wood Middle School, Darby
Ohio: Sandusky County, Neeley Center
North Carolina: Charlotte. TBD
Australia: Perth, TBD

This program is open to any student 13-18 years-old with a willingness to learn, work collaboratively, and who has a desire to address real global issues for the betterment of all mankind. If you are such a student, please join us for this event. Students will stay on site throughout the 48 hr program. You may select your location when you register.

To register go to our website or scan the code:
