*Working with We Connect the Dots has been a life-changing experience. From a young age I have been interested in computers and everything technology-related, but WCTD gave me a medium to share that passion with others. Now that I am pursuing an engineering degree in college, WCTD reminds me to continue to share my love for STEAM and broaden my impact on the next generation of the workforce.*

-Ojas Mehta, Program Manager

# About Us

We Connect The Dots (WCTD) is a nonprofit organization with a mission to utilize cognitive learning and coaching models to create positive outcomes across communities. Where technology is used as a tool for supporting productive and engaging learning experiences. We Connect the Dots provides program offerings for underrepresented populations. To model and teach how technology increases potential and productivity, we must understand it in real-world applications. We support communities by providing experiential learning programs to populations that would normally not have access or the resources to provide these immersive education programs.

*Microsoft Certification Training  
AWS Certification Training  
CompTIA Security+ Certification*

"I was assigned to a job at the Village Hall of Southampton, NY and it was the best thing that has happened to me. The four weeks during the workforce experience was honestly terrific, especially working with these lovely ladies that I care about so much and can't imagine myself anywhere else.

Jaeda G., UpSkill Program Participant, NY

Our STEAM Education and Technology Workforce Development Programs begin with the career goal in mind. At the local, national, and global level, we engage with industries, educators, and community partners to understand challenges, translate them into skills, and deliver intensive trainings to participants who graduate and are ready to make meaningful contributions to organizations. Our workforce partners continually ensure that WCTD's curriculum is up to date to ensure success. We integrate soft skills training to teach participants how to work collaboratively, communicate across teams, and present themselves to employers. By incorporating career evaluations, career coaching and resume preparation into our workforce development programs we ensure our graduates are confident and competent in the interview process. As a result of blending soft skills and workforce readiness training we increase our employment rates and entry in to Computer Science related higher education.

# Learner Support

---

Building a career in today's modern workforce is challenging, and sometimes it can be overwhelming to move through change. Our team of on-site and online personnel are there to help everyone be successful. From teamwork to coaching, We Connect The Dots' Technology Workforce Development and STEAM Education Programs teach more than just coding skills. We equip participants with the ability to think critically, think computationally, build strong problem-solving skills, how to overcome adversity, and to build confidence in entering careers in a modern workforce. From programming languages to industry best practices, participants get hands-on experience working with today's web development and cloud-based tools.

## Workforce Experience

The UpSkill learning program includes 4 weeks of workforce training followed by 4 weeks of workforce experience, where participants will have the opportunity to demonstrate their new skills working in entry level technology administrative roles for local businesses and nonprofits. This program takes a holistic approach, teaching both soft skills and technical skills to build capacity in solving complex problems, cross collaborating with team members, synthesize information, and learning about the many career opportunities in tech.

82%

of our graduates feel prepared to be successful

73%

of our graduates feel they will be successful in college

73%

of our graduates want a career in STEAM

# Outcomes

## UpSkill. Built. To. Scale.

of our students completed the workforce training from our UpSkill Program

of our students completed the workforce experience from our UpSkill Program

of our graduates were hired by their assigned workforce experience employer or enrolled in programs to gain additional computer science education

*"We learned how to recognize our emotions and how to handle our emotions when triggered. Also, in the process of trying to help improve ourselves, we should be mindful of the other person's state of mind. This is vital in the workplace."*

- Aysia M., Upskill Program Participant, NY

## LEARN TO CODE INDUSTRY INSTRUCTORS

Students invest in their future by learning invaluable technology and coding skills. Taking place each January, the program offers a blended model (virtual/on-site). With coding training classes delivered by industry instructors and followed by a 3-day Code-A-thon weekend where students collaborate on teams for project development and compete for fun prizes.

*"We Connect The Dots is a great option for anyone looking to learn how to code. I am a high school student and returning alumni to the annual Code-A-Thon. As a result I have passed my Microsoft Introduction to Programming using HTML and CSS exam."*

- Alex Weigand, Student, NY

# Outcomes

Career Exploration. Teamwork.  
Collaboration. Problem Solving.

of our students believe they will be successful in college

of our students believe they will have a successful career in STEAM

of our students like to work in groups

of our students would recommend the program to others

## AI Education: An Economic Imperative

Now, more than ever, is the time to provide in-demand cloud computing skills, training and a connection to high paying jobs. Emerging technology is significantly transforming the way we work and live. We believe that marginalized communities should not be excluded from the opportunities that these changes create.

*"The challenge was incredible, it really exposed me to things I didn't know before. Today I'm okay with cloud technologies and can work with them effectively. Thanks to AWS for helping in making it all possible."*

- Obinna Enoch Nnamani, Ihechukwu Madubiuke  
Institute of Technology, Nigeria

# Outcomes

100% of our students are interested in getting certifications in AWS

91% of our students overall computer skills have greatly improved as a result of the program

Top 5 Tech Skills Gained
Alexa Skills Kit
Amazon Developer Account
Cybersecurity
Python
Machine Learning

\$20,500 scholarships awarded

"I loved the Keynote Speaker presentations, especially Intro to Machine Learning. It's a concept that I didn't think about before and I saw a new world of opportunities to explore"

- Mariam Hazali, IT Support Specialist, U.S.A.
