

Epilepsy Patients

1. Were you the product of a normal pregnancy and delivery? If not, what were the issues?
2. Did you have a normal development? (talked/walked at ~ 1year)
3. Any problems with school? Learning disabilities?
4. Did you ever have any staring spells? Loss of awareness episodes?
5. Did you ever have any repetitive movements (lip smacking, eye blinking, etc)
6. Did you ever have recurrent symptoms of De Jha Vu?
7. Did you ever have recurrent smells, tastes, or other sensations that are stereotyped?
8. Have you ever had a brain MRI? If so, where and when?
9. Have you had any head injuries?
10. Did you ever have a seizure as a child, perhaps with high fever?
11. Any family history of seizures?
12. Have you ever had an EEG? If so, where and when?
13. Have you ever woken up having bit your tongue or lost control of bowel/bladder function?
