

## SHELVES

38x38X180cm (LxWxH).

The units allow to be placed freely. Its main structure consists on a frame with glued cross-lapped doweled joints. A secondary frame allows the user to define the position of the shelves. This permits a variety of uses, defined by objects and its different sizes.

*The final treatment of surfaces consist on a mix of natural oils and waxes (Sunflower, Soy and Thistle oil, and Carnauba and Candelilla Wax), which is micro-porous (allowing the wood to breathe, moisture can evaporate), and gives the surface resistance to water, dirt, and common household substances, plus giving it a clear satin finish that accentuates the grain and texture of the wood.*
