

CHEST OF DRAWERS

210x38x75cm (LxWxH).

The chest of drawers is built on wooden Pine frames in 20mm by 20mm cross sections. The design is flexible and customizable in terms of width and height.

It features five drawers that run on wooden slides, fixed between the frames.

The final treatment of surfaces consist on a mix of natural oils and waxes (Sunflower, Soy and Thistle oil, and Carnauba and Candelilla Wax), which is micro-porous (allowing the wood to breathe, moisture can evaporate), and gives the surface resistance to water, dirt, and common household substances, plus giving it a clear satin finish that accentuates the grain and texture of the wood.
