	Samsung Galaxy Tab4 10.1	7,123		Kindle Fire (2015)
				Kindle Fire HD8 (2016)

## Common Questions

**Question:** My Device isn't listed, does that mean hoopla will not work on it?

**Answer:** Our app works on the majority of Android devices that are running 4.1x & up, along with iOS devices that are running iOS 8 & up. We always recommend updating the operating system on the device to the latest version, for the best possible experience.

**Question:** What makes a device not be supported by hoopla?

**Answer:** Because of the rapid-moving nature of mobile technology, older devices tend to reach a point where they can no longer support the advances and updates. hoopla digital strives to support older devices as long as internally possible, but given the volume of devices available the feasibility of supporting older devices comes at a cost, bad user experiences, which is not deemed good customer service on our part and therefore no longer supported.
