The Nano-Ag Answer® is one of the most effective and least expensive fertilizers on the market. It also happens to be organic (OMRI Listed). Nano-Ag provides all the same benefits of conventional fertilizers, but also increases production, improves harvests and reduces costs.

Feeding plants & soil the way nature intended.

The Nano-Ag Answer® is an NPK fertilizer that is a proprietary blend of 3 components: (1) BILLIONS of microorganisms, (2) Sea kelp, and (3) Mineral electrolytes. When mixed & activated with water, these microbes wake up and reproduce. In just 48 hours you have a “boom population” - BILLIONS of soil builders ready to get to work in the field.

BIG results at a low cost.

Customers consistently see healthier crops, significant yield increases, predatory pests. The Nano-Ag Answer® is one of the least expensive solutions. The Nano-Ag Answer® is compatible with other fertilizers and amendments.

Unbeatable coverage in such a small package.

We call it The Nano-Ag Answer® because it’s small... REALLY small. Many find it hard to believe that such a small amount of material can achieve such a dramatic coverage. We just ask you to look at our Field Studies. The Nano-Ag Answer® harnesses the power of billions of hardworking microorganisms that bring life & balance back into the soil. Depending on the size of your ranch, we offer 3-different coverage configurations.

ONE product, MANY benefits.

Reduce water usage: The Nano-Ag Answer® creates more tilth in the soil and more efficient nutrient uptake - some of our customers have seen up to a 20% reduction in water usage.

Remediate algae blooms & runoff: The Nano-Ag Answer® helps balance run-off: better report cards & better water quality.
