PRODUCT NEWS RELEASE

Swift Creek Inc. introduces the world's best grouse flight fence marker for prevention of fence line collisions. The new Grouse Flight Diverter, developed by a biologist in the western U.S.A., offers an answer to collision problems in low-light and fog conditions. This product is very visible to grouse during low-level flight toward wires. (83% effective based on scientific studies.) These fence tags are installed on the top wire of the oil or gas well perimeter fence. The Snap-on Fence Marker flips in the wind reflecting the sunlight in order to increase visibility to approaching grouse in flight near existing or newly - fenced areas.

Follows Jan. 2013- BLM –Best management Practice Guidelines for Fluids Minerals doc. Wildlife Management.

10 Year Warranty.

Dimensions approximately 3" x 2".

Retail Price – 0.60 USD each
