Black Genocide in Pennsylvania

Genocide is the “systematic annihilation of a racial, political, or cultural group,” according to the American Heritage Dictionary. Then it follows that **abortion is black genocide, because blacks in America are especially targeted for this life-taking practice.**

According to the 2010 Census data, about 11 percent of all Pennsylvanians are African American. The Pennsylvania Department of Health annual report on abortion statistics for 2013 reported that **more than 42 percent of the 32,108 abortions performed on Pennsylvania residents were to black women.** The math doesn't lie.

But this is the dirty little secret of the abortion industry: Eliminate blacks before they are born.
At one time in American

history, there was support for the concept that black people were not human. African Americans were sold into slavery and abused by the people who considered them to be inferior.

Today, there are those in our culture who, under the guise of choice, **promote the concept that preborn black babies are not human.** These innocent babies are therefore subject to abuse and death in their mothers' wombs.

Most people are unaware of this black genocide. Hence, there is a general lack of outrage on the part of black America!
