

## Exploring Color with Betsey Leach

**Tuesdays 6-8 pm: September 1st – October 20th or  
Fridays 10am-12pm: September 4th – October 23rd.  
\$180/8 week session (most materials included)**

Color is vast and exciting... This color theory course will explore the qualities and interactions of color through presentations and a set of direct experiences, to help train and sharpen your eye to perceive, understand, and apply color. The overall goal is to give you an informed foundation for color mixing and usage enhancing your ability to choose the right colors for your projects.

Topics covered include:

- The Perception of Color - light and vision.
- Additive and subtractive color (light and paint).
- Value, Hue, Chroma (Intensity), and color temperature.
- Color palettes and color harmonies.
- Compositional effects of color use.
- Identifying and understanding color mixtures.
- Cultural influences on color usage.
