Groups for Girls

List of Trainings Offered as of 9/23/2020

What is We Rise?
Approximately 1 hour

This presentation is intended to provide an overview of the We Rise program. Topics covered include our survivor-led practice model, details of the referral process, our continuum of services, as well as our hotline service. This presentation will also include the risk factors and red flags that not only we look out for, but raise awareness of for others in youth-interfacing roles. Participants will leave with an increased understanding of We Rise and be able to accurately describe our emerging role in the broader fight against sexual exploitation.

An Introduction to CSEC Populations for Centerboard Staff
Approximately 1 hour

This is a one-hour introductory level training designed for Centerboard staff, interns and providers who may interact with CSEC youth in their respective roles at our agency. This training will ensure that all Centerboard staff are able to define, recognize, and appropriately respond to sexually exploited youth in the context of their service setting. Participants will receive instruction on handling disclosures, describing the work of We Rise, and supporting youth in their healing journey.
Safeguarding Our Youth in Our Program
Encountering Sexually Exploited Youth in the Behavioral Health Setting
Approximately 1 hour

This is a one-hour introductory level training designed for clinical and paraprofessional behavioral health providers who may encounter sexually exploited youth in their practice. This training will ensure that providers are able to define, recognize, and respond to sexually exploited youth in the context of their service setting. Through clarifying the continuum of sexual abuse and exploitation, enumerating risk factors and red flags, and providing practical instruction on responding to disclosures, engaging exploited clients, and accessing appropriate resources. The goal of this training is to assist behavioral health providers in improving their service provision for the CSEC population.
